Somatic States Franck Bill examines the conceptual link between the nation state and the body particularly the visceral and affective attachment to the state and the symbolic significance of its borders Bill argues that corporeal analogies to the nation state are not simply poetic or allegorical but reflect a genuine association of the individual body with the national outline an identification greatly facilitated by the emergence of the national map Bill charts the evolution of cartographic practices and the role that political maps have played in transforming notions of territorial sovereignty He shows how states routinely and effectively mobilize corporeal narratives such as framing territorial loss through metaphors of dismemberment

and mutilation Despite the current complexity of geopolitics and neoliberalism Bill demonstrates that corporeality and bodily metaphors remain viscerally powerful because they offer a seemingly simple way to apprehend the abstract nature of the nation state
