Ray Tracing: A Tool for All Jon Peddie, 2019-08-08 This is the first book to offer a comprehensive overview for anyone wanting to understand the benefits and opportunities of ray tracing as well as some of the challenges without having to learn how to program or be an optics scientist It demystifies ray tracing and brings forward the need and benefit of using ray tracing throughout the development of a film product or building from pitch to prototype to marketing Ray Tracing and Rendering clarifies the difference between conventional faked rendering and physically correct photo realistic ray traced rendering and explains how programmer s time and backend compositing time are saved while producing more accurate representations with 3D models that move Often considered an esoteric subject the author takes ray tracing out of the confines of the programmer s lair and shows how all levels of users from concept to construction and sales can benefit without being forced to be a practitioner It treats both theoretical and practical aspects of the subject as well as giving insights into all the major ray tracing programs and how many of them came about It will enrich the readers understanding of what a difference an accurate high fidelity image can make to the viewer our eyes are incredibly sensitive to flaws and distortions and we quickly disregard things that look phony or unreal Such dismissal by a potential user or customer can spell disaster for a supplier producer or developer If it looks real it will sell even if it is a fantasy animation Ray tracing is now within reach of every producer and marketer and at prices one can afford and with production times that meet the demands of today s fast world

Kubernetes for Generative AI Solutions Ashok Srirama, Sukirti Gupta, 2025-06-06 Master the complete Generative AI project lifecycle on Kubernetes K8s from design and optimization to deployment using best practices cost effective strategies and real world examples Key Features Build and deploy your first Generative AI workload on Kubernetes with confidence Learn to optimize costly resources such as GPUs using fractional allocation Spot Instances and automation Gain hands on insights into observability infrastructure automation and scaling Generative AI workloads Purchase of the print or Kindle book includes a free PDF eBook Book Description Generative AI GenAI is revolutionizing industries from chatbots to recommendation engines to content creation but deploying these systems at scale poses significant challenges in infrastructure scalability security and cost management This book is your practical guide to designing optimizing and deploying GenAI workloads with Kubernetes K8s the leading container orchestration platform trusted by AI pioneers Whether you re working with large language models transformer systems or other GenAI applications this book helps you confidently take projects from concept to production You ll get to grips with foundational concepts in machine learning and GenAI understanding how to align projects with business goals and KPIs From there you ll set up Kubernetes clusters in the cloud deploy your first workload and build a solid infrastructure But your learning doesn t stop at deployment The chapters highlight essential strategies for scaling GenAI workloads in production covering model optimization workflow automation scaling GPU efficiency observability security and resilience By the end of this book you ll

be fully equipped to confidently design and deploy scalable secure resilient and cost effective GenAI solutions on Kubernetes What you will learn Explore GenAI deployment stack agents RAG and model fine tuning Implement HPA VPA and Karpenter for efficient autoscaling Optimize GPU usage with fractional allocation MIG and MPS setups Reduce cloud costs and monitor spending with Kubecost tools Secure GenAI workloads with RBAC encryption and service meshes Monitor system health and performance using Prometheus and Grafana Ensure high availability and disaster recovery for GenAI systems Automate GenAI pipelines for continuous integration and delivery Who this book is for This book is for solutions architects product managers engineering leads DevOps teams GenAI developers and AI engineers It s also suitable for students and academics learning about GenAI Kubernetes and cloud native technologies A basic understanding of cloud computing and AI concepts is needed but no prior knowledge of Kubernetes is required **Data Science on AWS** Chris Fregly,Antje Barth,2021-04-07

With this practical book AI and machine learning practitioners will learn how to successfully build and deploy data science projects on Amazon Web Services The Amazon AI and machine learning stack unifies data science data engineering and application development to help level up your skills This guide shows you how to build and run pipelines in the cloud then integrate the results into applications in minutes instead of days Throughout the book authors Chris Fregly and Antje Barth demonstrate how to reduce cost and improve performance Apply the Amazon AI and ML stack to real world use cases for natural language processing computer vision fraud detection conversational devices and more Use automated machine learning to implement a specific subset of use cases with SageMaker Autopilot Dive deep into the complete model development lifecycle for a BERT based NLP use case including data ingestion analysis model training and deployment Tie everything together into a repeatable machine learning operations pipeline Explore real time ML anomaly detection and streaming analytics on data streams with Amazon Kinesis and Managed Streaming for Apache Kafka Learn security best practices for data science projects and workflows including identity and access management authentication authorization and more *Internet of Vehicles. Technologies and Services Toward Smart Cities* Ching-Hsien Hsu,Sondès Kallel,Kun-Chan

Lan,Zibin Zheng,2020-01-18 This book constitutes the proceedings of the 6th International Conference on the Internet of Vehicles IOV 2019 which took place in Kaohsiung Taiwan in November 2019 The 23 papers presented in this volume were carefully reviewed and selected from 101 submissions The papers focus on providing new efficient solutions with digital intervehicular data transfer and overall communications Yet IOV is different from Telematics Vehicle Ad hoc Networks and Intelligent Transportation in which vehicles like phones can run within the whole network and obtain various services by swarm intelligent computing with people vehicles and environments **Accelerator Programming Using Directives**

Sridutt Bhalachandra,Sandra Wienke,Sunita Chandrasekaran,Guido Juckeland,2021-04-16 This book constitutes the proceedings of the 7th International Workshop on Accelerator Programming Using Directives WACCPD 2020 which took place on November 20 2021 The workshop was initially planned to take place in Atlanta GA USA and changed to an online

format due to the COVID 19 pandemic WACCPD is one of the major forums for bringing together users developers and the software and tools community to share knowledge and experiences when programming emerging complex parallel computing systems The 5 papers presented in this volume were carefully reviewed and selected from 7 submissions They were organized in topical sections named OpenMP OpenACC and Domain specific Solvers

I-Bytes Technology Industry
IT-Shades,2019-11-11 This document brings together a set of latest data points and publicly available information relevant for Technology Industry We are very excited to share this content and believe that readers will benefit from this periodic publication immensely

Computer Graphics Programming in OpenGL with C++ V. Scott Gordon,John Clevenger,2024-03-12 This updated edition includes step by step instruction on modern OpenGL 4 0 GLSL shader programming with C along with the theoretical foundations of 3D computer graphics Every shader stage is explored from the basics of modeling textures lighting shadows etc through advanced techniques such as tessellation noise maps water and stereoscopy This new edition includes expanded coverage of camera control refraction and a new chapter on ray tracing with bounding volume hierarchies for complex models The companion files include all the source code shaders model files skyboxes etc needed to run every example in the book

Maximum PC ,1998-12 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave

The 22nd International Conference on Information Technology-New Generations (ITNG 2025) Shahram Latifi,2025-05-08 This book covers technical contributions that have been submitted reviewed and presented at the 22nd annual event of International conference on Information Technology New Generations ITNG The applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are among topics of relevance to ITNG Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest Machine Learning Robotics High Performance Computing and Innovative Methods of Computing are examples of related topics

IBM PowerAI: Deep Learning Unleashed on IBM Power Systems Servers Dino Quintero,Bing He,Bruno C. Faria,Alfonso Jara,Chris Parsons,Shota Tsukamoto,Richard Wale,IBM Redbooks,2019-06-05 This IBM Redbooks publication is a guide about the IBM PowerAI Deep Learning solution This book provides an introduction to artificial intelligence AI and deep learning DL IBM PowerAI and components of IBM PowerAI deploying IBM PowerAI guidelines for working with data and creating models an introduction to IBM Spectrum™ Conductor Deep Learning Impact DLI and case scenarios IBM PowerAI started as a package of software distributions of many of the major DL software frameworks for model training such as TensorFlow Caffe Torch Theano and the associated libraries such as CUDA Deep Neural Network cuDNN The IBM PowerAI software is optimized for performance by using the IBM Power Systems™ servers that are integrated with NVLink The AI stack foundation starts with servers with accelerators graphical

processing unit GPU accelerators are well suited for the compute intensive nature of DL training and servers with the highest CPU to GPU bandwidth such as IBM Power Systems servers enable the high performance data transfer that is required for larger and more complex DL models This publication targets technical readers including developers IT specialists systems architects brand specialist sales team and anyone looking for a guide about how to understand the IBM PowerAI Deep Learning architecture framework configuration application and workload configuration and user infrastructure **The History of the GPU - New Developments** Jon Peddie,2023-01-01 This third book in the three part series on the History of the GPU covers the second to sixth eras of the GPU which can be found in anything that has a display or screen The GPU is now part of supercomputers PCs Smartphones and tablets wearables game consoles and handhelds TVs and every type of vehicle including boats and planes In the early 2000s the number of GPU suppliers consolidated to three whereas now the number has expanded to almost 20 In 2022 the GPU market was worth over 250 billion with over 2.2 billion GPUs being sold just in PCs and more than 10 billion in smartphones Understanding the power and history of these devices is not only a fascinating tale but one that will aid your understanding of some of the developments in consumer electronics computers new automobiles and your fitness watch General-Purpose Graphics Processor Architectures Tor M. Aamodt,Wilson Wai Lun Fung,Timothy G. Rogers,2022-05-31 Originally developed to support video games graphics processor units GPUs are now increasingly used for general purpose non graphics applications ranging from machine learning to mining of cryptographic currencies GPUs can achieve improved performance and efficiency versus central processing units CPUs by dedicating a larger fraction of hardware resources to computation In addition their general purpose programmability makes contemporary GPUs appealing to software developers in comparison to domain specific accelerators This book provides an introduction to those interested in studying the architecture of GPUs that support general purpose computing It collects together information currently only found among a wide range of disparate sources The authors led development of the GPGPU Sim simulator widely used in academic research on GPU architectures The first chapter of this book describes the basic hardware structure of GPUs and provides a brief overview of their history Chapter 2 provides a summary of GPU programming models relevant to the rest of the book Chapter 3 explores the architecture of GPU compute cores Chapter 4 explores the architecture of the GPU memory system After describing the architecture of existing systems Chapters 3 and 4 provide an overview of related research Chapter 5 summarizes cross cutting research impacting both the compute core and memory system This book should provide a valuable resource for those wishing to understand the architecture of graphics processor units GPUs used for acceleration of general purpose applications and to those who want to obtain an introduction to the rapidly growing body of research exploring how to improve the architecture of these GPUs **Google Cloud Platform for Data Engineering** Alasdair Gilchrist, Google Cloud Platform for Data Engineering is designed to take the beginner through a journey to become a competent and certified GCP data engineer The book therefore is split into three

parts the first part covers fundamental concepts of data engineering and data analysis from a platform and technology neutral perspective Reading part 1 will bring a beginner up to speed with the generic concepts terms and technologies we use in data engineering The second part which is a high level but comprehensive introduction to all the concepts components tools and services available to us within the Google Cloud Platform Completing this section will provide the beginner to GCP and data engineering with a solid foundation on the architecture and capabilities of the GCP Part 3 however is where we delve into the moderate to advanced techniques that data engineers need to know and be able to carry out By this time the raw beginner you started the journey at the beginning of part 1 will be a knowledgeable albeit inexperienced data engineer However by the conclusion of part 3 they will have gained the advanced knowledge of data engineering techniques and practices on the GCP to pass not only the certification exam but also most interviews and practical tests with confidence In short part 3 will provide the prospective data engineer with detailed knowledge on setting up and configuring DataProc GCPs version of the Spark Hadoop ecosystem for big data They will also learn how to build and test streaming and batch data pipelines using pub sub dataFlow and BigQuery Furthermore they will learn how to integrate all the ML and AI Platform components and APIs They will be accomplished in connecting data analysis and visualisation tools such as Datalab DataStudio and AI notebooks amongst others They will also by now know how to build and train a TensorFlow DNN using APIs and Keras and optimise it to run large public data sets Also they will know how to provision and use Kubeflow and Kube Pipelines within Google Kubernetes engines to run container workloads as well as how to take advantage of serverless technologies such as Cloud Run and Cloud Functions to build transparent and seamless data processing platforms The best part of the book though is its compartmental design which means that anyone from a beginner to an intermediate can join the book at whatever point they feel comfortable

Intelligent Computers, Algorithms, and Applications

Chunjie Luo, Weiping Li, 2025-05-22 This book constitutes the proceedings of the 4th BenchCouncil International Symposium on Intelligent Computers Algorithms and Applications IC 2024 held in Guangzhou China during December 4 6 2024 The 16 full papers included in this book were carefully reviewed and selected from 31 submissions They were organized in topical sections as follows Algorithms Education Evaluation System
