the world from skipping breakfast or opting for only a drink of coffee The truth is that breakfast really is the most important meal of the day and you will have a much more healthy diet if you include breakfast in your daily life Breakfast is rightly named break fast When you sleep you are not eating for 6 to 9 hours at least and more if you haven't eaten since dinner the night before Therefore breakfast is the first time you'll be eating anything for a very long period of time Some nutrients like proteins cannot be stored in the body and are therefore not present so the body needs you to replenish the low levels of such nutrients Breakfast is like the match that lights the fire It truly is a very important source of energy for your body in the morning Eating breakfast in the morning also helps you avoid some illnesses and disease For example your sugar levels are probably out of whack from not eating for many hours so having breakfast levels out the amount of sugars in your body helping to prevent diabetes Eating a healthy breakfast also helps you to provide food to your stomach so that you don't overeat at lunch because you are so hungry Overeating leads to obesity which comes with a whole host of problems including heart disease
