Campbell-Whatley, Diane Rodriguez, Jugnu Agrawal, 2021 This innovative STEAM guide will help general and special education teachers to increase effective instruction with adolescents grades 5 10 The authors show teachers how to link STEM concepts with popular fiction and film selections as a catalyst to launch student interactions discussions projects and investigations This approach will promote problem solving and reasoning skills by initiating the scientific process rather than simply presenting established facts The book includes a wealth of lesson plans that connect abstract STEM ideas to realistic experiences that students encounter Sample lessons call on students to produce drawings and models that move STEM to STEAM Grounded in popular film and the 31 books most read by adolescent students the text includes teaching strategies found to be effective with traditionally underserved students and those with disabilities Book Features Standards based STEM lessons are interrelated and interwoven with writing reading speaking and other skills Practical ideas and hands on activities for engaging adolescents in both traditional and virtual environments Guidance for working with diverse populations such as students with different abilities culturally and linguistic diverse students translingual students and transnational students Includes full lessons templates and handouts *Longshot* David

Heath, 2022-01-18 This is the incredible story of the scientists who created a coronavirus vaccine in record time In *Longshot* investigative journalist David Heath takes readers inside the small group of scientists whose groundbreaking work was once largely dismissed but whose feat will now eclipse the importance of Jonas Salk's polio vaccine in medical history With never before reported details Heath reveals how these scientists overcame countless obstacles to give the world an unprecedented head start when we needed a COVID 19 vaccine The story really begins in the 1990s with a series of discoveries that were timed perfectly to prepare us for the worst pandemic since 1918 Readers will meet Katalin Karik who made it possible to use messenger RNA in vaccines but struggled for years just to hang on to her job There's also Derrick Rossi who leveraged Karik's work to found Moderna but was eventually expelled from his company And then there's Barney Graham at the National Institutes of Health who had a career long obsession with solving the riddle of why two toddlers died in a vaccine trial in 1966 a tragedy that ultimately led to a critical breakthrough in vaccine science With both foresight and luck Graham and these other crucial scientists set the course for a coronavirus vaccine years before COVID 19 emerged in Wuhan China The author draws on hundreds of hours of interviews with key players to tell the definitive story about how the race to create the vaccine sparked a revolution in medical science **Women and Girls in STEM Fields** Heather Burns Page, 2024-09-19

Written by a respected science educator and advocate for women and girls in STEM fields this one stop resource provides a rich overview of efforts to provide women and girls with greater access to educational and career opportunities in traditionally male dominated STEM fields Since the passage of Title IX the numbers of American women working in STEM fields have increased particularly in the social and biological sciences Nonetheless women continue to be underrepresented

in STEM disciplines accounting for less than a third of the current STEM workforce When the intersection of sociocultural factors such as race ethnicity and socioeconomic background are examined alongside gender some demographic groups of women continue to lag in terms of representation in all STEM fields The reasons cited for this continued state of affairs remain hotly debated even as efforts intensify to break down longstanding gender barriers and bring women and girls into the worlds of science technology engineering and mathematics Women and Girls in STEM Fields provides wide ranging complementary coverage of every aspect of the issue from the historical barriers that confronted generations of American women and girls interested in pursuing careers in various STEM disciplines to the laws and movements that dismantle some of those obstacles Features include smartly organized chapters on major trends issues debates and historical moments carefully selected profiles of the key organizations and individuals that have shaped discussions of this subject in Washington D C and across the USA a suite of original essays from educators scholars and women writing about their firsthand experiences in today s STEM world

Libraries have historically played a role as a community builder providing resources and spaces where knowledge can be archived shared and created They can also play a pivotal role in fostering the public s understanding of science and scientific processes From

makerspaces to data visualization labs to exhibits many libraries already delve into scientific explorations and many more could join them Scientists often need to include broader impacts goals in grant proposals but they might not know where to begin or feel that they do not have the time to devote to public engagement This is where libraries and librarians can help Research in science communication also supports tapping into libraries for public engagement with science Studies show that it is important for scientists to present findings in an apolitical way not aligning with one solution or one way of thinking and not being seen as an activist Druckman 2015 Jamieson Hardy 2014 One of the core tenets of librarians and libraries is to present information in a neutral way Research also shows that Informal conversations about science can have a greater effect on people than reading about it online or hearing about it on the news Eveland Cooper 2013 Again libraries can play a role in fostering these types of conversations Given this landscape this book will demonstrate concrete ways that libraries and librarians can play a role in fostering public engagement with science In addition to background information on the current landscape of public knowledge and understanding of science it will also include best practices and case studies of different types of programming and services that libraries can offer Often libraries do not jump to mind when people think about science education or science literacy and many librarians do not come from a science background Literature on science programming and sharing science is largely absent from the library field This book will help give confidence to librarians that they can participate in engaging the public with science At the same time it will provide a conduit to bring informal science educators communication officers from universities or research organizations who share scientific discoveries with the public and librarians together to explore ways to align their work to promote scientific literacy for all Demonstrates concrete ways that libraries and librarians can play a role in fostering public engagement with science Features best practices and case studies of different types of programming and services that libraries can offer Provides a conduit to bring informal science educators communication officers and librarians together to explore ways to align their work to promote scientific literacy
