Tahir M. Nisar

Max Streaming 2025 Customer Service:

Personalization and Digital Social Markets Tahir M. Nisar, 2025-01-09 Tahir Nisar presents a cogent compelling account of recent developments and disruptions within the digital economy and particularly within the industrial and service sectors. Through an original overarching framework rooted in the concept of personalization and its antecedents, Nisar identifies radically new forms of relationships both economic and social among firms and customers. These new relationships are driving major changes in commercial and industrial firms' policies and practices and in turn in the entire market economy. E-commerce, trading, user-generated content, virtual communities, co-creation, influencer movements, FinTech, and sharing economies have strengthened the hands of consumers and have encouraged developments in cognitive technologies such as AI automation, which in turn create new ways of working and disruptions to traditional capital-labour relations. Ultimately, what emerges from this study is a picture of how digital technologies unleash forces of change that are creating new forms of social and economic sharing arrangements and new forms of social organization. For its empirical depth and theoretical rigor, this book is essential reading for researchers and students interested in emerging alternative forms of economics, business, and management and particularly those interested in the digital economy and the state and future of capitalist markets.

From Telenovelas to Netflix: Transnational, Transverse Television in Latin America Joseph Straubhaar, Melissa Santillana, Vanessa de Macedo Higgins Joyce, Luiz Guilherme Duarte, 2021-12-06 This book is about television in Latin America. Its national and regional industries create most television programming there within genres developed over time in the region. However, part of the programming has always come from the U.S., Europe, and elsewhere. With cable, satellite, and now streaming TV, that inflow of foreign programming has increased substantially. While many in the audience still prefer national or regional programs for their cultural proximity, an increasing number among the upper middle and middle classes, particularly the young, are turning to the new foreign services like Netflix, Amazon, and Disney for class distinction, cosmopolitanism, or other motives. Among the television industries, global, regional, and national actors are creating a variety of programs and channels, broadcast, pay TV, and streaming, to segment and appeal to different parts of the audience.
