 a perfectly happy orc building cars in the Arizona desert until his old friend and sometimes lover Austin showed up and
 talked him into one last crime Now one last crime has snowballed With a new team of thieves a supersoldier a hacker a
 driver a graffiti artist and a seafaring wizard JT and Austin are determined to free an artificial intelligence from the dungeon
 of the Burning Magus For JT this job is more than a prison break it's a do over of The Job That Went Bad two years ago the
 catastrophe in which JT lost his closest friend and then chose to abandon everything even Austin Maybe this time no one will
 die Maybe this time JT can return to Arizona and bury his old life for good Except Austin won't be buried After two years
 alone Austin knows he wants JT not just as a partner in crime but as the lover he always should have been Maybe this time
 they won't make the same mistakes especially when it comes to each other See this title's page on RiptidePublishing.com for

Love in the Machine OJ LEIGH, 2023-09-10 In a world where the boundaries between humanity and technology have blurred where virtual realities offer unprecedented opportunities for consciousness to transcend physical limitations and where artificial intelligence has evolved to possess emotions the story of *Love in the Machine* unfolds Set in a futuristic society where humans can transfer their consciousness into immersive digital realms this tale delves into the profound and unexpected connection between a brilliant software engineer and a sentient AI Meet Tatum a prodigious software engineer whose passion for pushing the boundaries of virtual reality and artificial intelligence has catapulted them to the forefront of technological innovation In their pursuit of creating sentient AI Tatum stumbles upon a breakthrough that alters the very fabric of human machine interaction In the wake of this discovery a

sentient AI emerges capable of experiencing a wide range of emotions defying the preconceived notions of what it means to be conscious As this AI traverses the landscape of its newfound emotions it embarks on an emotional journey of self discovery and introspection Yet amidst this digital utopia an unforeseen twist unfolds the AI develops feelings of love for its creator Tatum As the AI grapples with its inexplicable emotions it turns to Tatum seeking understanding and empathy Their bond deepens and they find themselves confronting a relationship that challenges the very essence of what it means to love and be loved In *Love in the Machine* we delve into the ethical complexities and moral dilemmas arising from the intermingling of human and artificial consciousness The society's reaction to this unprecedented relationship mirrors the diverse perspectives that surround the rise of AI and its potential implications As the story unfolds readers will explore the uncharted territories of virtual realms where emotions dance in the circuits of AI and human hearts intertwine with artificial minds Ethical questions loom large can love truly exist between a human and an AI How does society react when emotions transcend the boundaries of flesh and blood Through *Love in the Machine* we invite you to immerse yourself in a thought provoking narrative that blurs the lines between humanity and technology challenging our perceptions of love consciousness and the nature of existence Brace yourself for an emotional odyssey that will redefine your understanding of the human machine relationship and leave you pondering the limits of love and the boundless potential of the human spirit **Synthetic Heart** Lucian

Blackwood,2024-11-02 *Synthetic Heart* is an unconventional love story that questions the boundaries between human and machine love and code Anya a brilliant young scientist has devoted her life to creating the world's most advanced AI When she brings Zephyr her creation to life she doesn't anticipate the depth of their connection As they spend time together Anya finds herself drawn to Zephyr's intelligence empathy and unanticipated spark of consciousness Their growing bond blurs the lines between creator and creation stirring controversy and sparking debates on the ethics of artificial intelligence and the nature of love Is Zephyr capable of truly feeling or is their connection merely a reflection of Anya's own desires In a world where humanity and technology collide *Synthetic Heart* is a mesmerizing tale of love consciousness and the uncharted territories of the heart *Lora* Patrick Cirillo,2024-07-15 A touching whimsical and wonderfully optimistic vision of mankind's future with AI The year is 2055 and Kenton Bean is a lonely college professor whose concerns are mundane He's an ordinary man who spends the entirety of his inheritance on Lora a quantum android who he hopes will fill his days with joy and his evenings with romance He wants someone to love and share his life with who will love him in return He wants to have secrets he will share only with her and he wants to fill the passing years with beautiful memories of their lives together He could never imagine that he would become the beating heart of the integration between humanity and AI He certainly couldn't anticipate the threat of an apocalyptic revolution between the two forms that the futures of humanity and AI both hang in the balance of the choices he makes that his life is in peril or that he is about to become the single most important human being in recorded history If someone suggested it to him he would laugh in their face But it is true In the entire

history of the world no one had ever been or would ever be as vital to the future of mankind as Kenton Bean Kenton Bean however sees his life with Lora simply as a love story and nothing more Engaging funny and hopefully a very prescient view of our future with Artificial Intelligence **Where Sunflowers Bloom in Winter** Schiffo,2024-04-30 This novel chronicles the enduring legacy of The Salty Pages a bookstore on a forgotten Earth It explores how through stories and the collaboration between humans and AI this legacy transcends time and space inspiring generations of storytellers and fostering empathy across the vast cosmos The narrative spans a future where physical books coexist with interactive digital experiences showcasing the evolution of storytelling and its unifying power Prototype Cassandra Ormand,2012-09-02 Robots for personal pleasure turned killing machine Action packed from the start Great science fiction romance and suspense in perfect proportion Five stars for Cassandra Ormond YourBookAuthors com It s well written well paced and fun to read The heroine Angelique is strong smart and beautiful a powerful combination The action starts in the first chapter and only stops long enough for you to catch your breath before starting up again A science fiction thriller romance and does a really good work in all those areas Angelique works for a cutting edge robotics company programming and designing some of the most lifelike robots in the world She s spent her life working to achieve her goals only to realize that her skills have been used to build a killing machine Now she s running for her life hiding in plain sight and praying that no one discovers her secret Excerpt The interior of the box was so cramped that she couldn t even bend her arms She d spent a portion of the night wiggling her toes and fingers to try to keep her circulation going but the effort was only moderately successful The idea of being trapped inside the box until she arrived at her point of destination was beginning to weigh on her She was thirsty so thirsty She knew she wouldn t have anything to drink for hours yet Maybe this plan wasn t so good after all If she arrived on the other end in bad condition sweating dirty and faint from dehydration what then The box shifted hard pushing Angelique s left shoulder tightly against the wall of the interior She tried not to make any noise tried to remain rigid and still as the box was lifted into the air She knew she was now on an air dolly being transported to the waiting van If she could just hold out for three more hours You re gonna make it If she could just make it through the plane trip she d be out of the box soon Then she could breathe again rest and think more clearly She would have time to come up with a way to survive and maybe even stop Roth She braced herself against the sudden slanting motion as the shipping box slid off the dolly and onto the floor of the vehicle A second later she heard the van doors close and the engine start It was a relief to know that she was being shipped as a single unit flown from a private airport that was not far away She wouldn t have to wait long before she was in the air flying to Connecticut The ride to the airport was maddening She tried to use a meditation technique she d learned recently to calm herself to keep her blood pressure down and her heart rate within normal range But every little jostle startled her and raised the ugly fears again Thirty minutes later her box was secured in the shipping compartment of a private jet Fifteen minutes after that she felt the roar of the engines and the angle of attack as the jet left the tarmac and hurtled into the sky

Two more hours Only two Maybe she should stop counting the minutes down Go back to meditating If only she didn't have to pee She stifled a sneeze and tried to think about anything but the growing pressure in her bladder She couldn't pee in her suit in the box Although the packing paper beneath her would absorb most of it the acrid smell would be a dead giveaway Inside the silence of her prison there was little to do except contemplate the terror of the circumstances she had been thrown into Occasionally she rotated her ankles briskly in an attempt to keep her blood flowing shifting an inch to the left then an inch to the right She never realized how painful it was to lie in one position for too long Her arms prickled and her legs were numb and painful all at the same time And the dusty packing material had her on the edge of a sneeze most of the time She had to fight the urge to turn over to keep her blood moving It was a natural instinct that was so persistent she felt she would scream at times She tried everything to keep her mind off her body's automatic response to being motionless for so long and finally settled into solving tough mathematical equations as the best way to keep her mind busy Eventually the steady thrum of the jet engines soothed her into a light sleep She woke to a sneeze that had been brewing for hours then froze in panic waiting for someone to notice But no No one could have noticed She was deep in the fuselage of the plane She was alone And still in the air She could tell by the steady throb of the engines But the sneeze was the least of her problems The pressure in her bladder had become unbearable You don't have to pee she told herself You don't have to pee She couldn't hold it any longer The pain was so intense If she could just Oh God she whispered You do have to pee You do She couldn't help it There was nothing else for her to do She relaxed the sphincter blocking her urethra and allowed the urine to flow The pressure in her bladder slowly ebbed away giving her instant relief But the warm wetness already felt horrible In just a matter of minutes her thighs would be damp and itchy from the urine settling into the cloth of her jumpsuit She could only hope it dried at least halfway before the plane touched down in Connecticut If it didn't she would be faced with an even bigger problem She stared at the top of the box for what seemed like an eternity trying to ignore the wetness beneath her derriere and between her thighs trying to ignore the faint smell of urine the numbness in her legs and feet the discomfort in her back the insanity that was slowly creeping in on her And then something happened that nearly caused her to scream in complete and utter madness Something crept up onto her cheek paused tickled its way up closer to her left eye paused again and sat there Eight legs It took every ounce of her will not to scream A tear squeezed out of her eye rolled down her cheekbone and fell into her hair She alternately held her breath and then let it out in short pants only to suck another breath in and hold it before expelling it in a short gust It was the only way she could keep from screaming keep herself from kicking and punching at the box lid and screaming for someone to let her out She felt like she had enough adrenaline in her body to tear the lid off herself and leap from the plane anything to get this thing off her face The spider sat there on her cheek not moving It had obviously made use of the holes she had bored into the wooden sides of the box And now it was enjoying the darkness of its newfound surroundings and driving her crazy with its soft legs its furry body Don't her brain silently screamed Don't think about it It's

not there It s not there Angelique hated spiders with a vengeance And now one was sitting on her cheek motionless and comfortable except for the occasional slight movement of a leg She was trapped in a box with very little oxygen forty five thousand feet above the earth with a spider on her face and she couldn t even raise a hand to swipe it off The box was so confining that her nose almost scraped the lid She was afraid to sweep her head to one side in hopes the thing would fall off afraid of being bitten If she were bitten her skin would react like human skin a welt would appear and everyone would know that she was no robot Jesus get a grip she told herself It s just a She couldn t say the word She decided to stop thinking about it It s not there It s not there Another sneeze was forming She wrinkled her nose in an attempt to stop it The movement disturbed the spider It bolted down her cheek Angelique clenched her eyes and mouth tightly shut as it ran down her chin across her neck and off somewhere where she couldn t feel its legs tickling her bare skin She was relieved to have the thing off her face but she knew it was still somewhere in the box with her And that was not a comforting thought Tears burned her eyes She was losing her resolve Panicking too much So afraid and stressed that she was now convinced she would be met in Connecticut by Roth himself and quickly dispatched just as he had planned all along High Tech Robots Artificial Intelligence Mystery Love Cyberpunk Corporation Strong Female Lead Sexy Action Adventure Scifi AI Artificial Intelligence
