Mobile Platforms and Development Environments Abdelsalam A. Helal, Sumi Helal, Raja Bose, Wendong Li, 2012
Mobile platform development has lately become a technological war zone with extremely dynamic and fluid movement especially in the smart phone and tablet market space This Synthesis lecture is a guide to the latest developments of the key mobile platforms that are shaping the mobile platform industry The book covers the three currently dominant native platforms iOS Android and Windows Phone along with the device agnostic HTML5 mobile web platform The lecture also covers location based services LBS which can be considered as a platform in its own right The lecture utilizes a sample application TwitterSearch that the authors show programmed on each of the platforms Audiences who may benefit from this lecture include 1 undergraduate and graduate students taking mobile computing classes or self learning the mobile platform programmability road map 2 academic and industrial researchers working on mobile computing R 3 mobile app developers for a specific platform who may be curious about other platforms 4 system integrator consultants and firms concerned with mobilizing businesses and enterprise apps and 5 industries including health care logistics mobile workforce management mobile commerce and payment systems and mobile search and advertisement Table of Contents From the Newton to the iPhone iOS Android Windows Phone Mobile Web Platform in Platform Location Based Services LBS The Future of Mobile Platforms TwitterSearch Sample Application [A History of the World in 12 Maps](#) Jerry Brotton, 2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph **Pro Web 2.0 Mashups** Raymond Yee, 2008-04-25 How many times have you seen a web

site and said This would be exactly what I wanted if only If only you could combine the statistics here with data from your company s earnings projections If only you could take the addresses for those restaurants and plot them on one map How often have you entered the date of a concert into your calendar with a single click instead of retyping How often do you wish that you could make all the different parts of your digital world your e mail your word processor documents your photos your search results your maps your presentations work together more seamlessly After all it s all digital and malleable information shouldn t it all just fit together In fact below the surface all the data web sites and applications you use could fit together This book teaches you how to forge those latent connections to make the Web your own by remixing information to create your own mashups A mashup in the words of the Wikipedia is a web site or web application that seamlessly combines content from more than one source 1 into an integrated experience Learning how to draw content from the Web together into new integrated interfaces and applications whether for yourself or for other others is the central concern of this book

The Map in the Machine Luis F. Alvarez Leon,2024-05-07 Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In The Map in the Machine Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change
