Disbelief Will M. Gervais, 2024-07-30 Does God exist This straightforward question has spawned endless debate ranging from apologists supposed proofs of God s existence to New Atheist manifestos declaring belief in God a harmful delusion In *Disbelief* Will M Gervais Phd a global leader in the psychological study of atheism shows that the ubiquity of religious belief and the peculiarities of atheism are connected pieces in the puzzle of human nature It s undeniable that religion is a core tenet of human nature It is also true that our overwhelmingly religious species is also as atheistic as it s ever been Yet no scientific understanding of religion is complete without accounting for those who actively do not believe In this refreshing and revelatory book Gervais argues that religion is not an evolutionary puzzle so much as two evolutionary puzzles that can only be solved together First is the Puzzle of Faith the puzzle of how Homo sapiens and Homo sapiens alone came to be a religious species Second is the Puzzle of Atheism how disbelief in gods can exist within our uniquely religious species The result is a radically cohesive theory of both faith and atheism showing how we became a uniquely religious species and why many are now abandoning their belief Through a firsthand account of breakthroughs in the scientific study of atheism including key findings from cognitive science cultural evolution and evolutionary psychology *Disbelief* forces a rethinking of the prevailing theories of religion and reminds both believers and atheists of the shared psychologies that set them on their distinct religious trajectories In casual prose and with compelling examples Gervais explains how we became religious why we re leaving faith behind and how we can get along with others across the religious divides we ve culturally evolved No Hard Feelings Genevieve Novak, 2022-04-01 Hungover underpaid and overwhelmed this isn t where Penny expected to be as she reached her late twenties A sharp smart and witty look at adultering Fleabag meets Sorrow and Bliss with a splash of Dolly Alderton *No Hard Feelings* is clever funny and surprisingly sweet and Penny captured my heart Toni Jordan I exist on validation from emotionally unavailable men biscuits and cheap wine and it s easier to get off with Max than a Tiny Teddy Penny can t help but compare herself to her friends Annie is about to become a senior associate at her law firm Bec has just got engaged Leo is dating everyone this side of the Yarra and Penny is just waiting Waiting for Max her on again off again boyfriend to allow her to spend the night waiting for the promotion she was promised waiting for her Valium to kick in Waiting for her real life to start Out of excuses and sick of falling behind Penny is determined to turn things around She s going to make it work with Max impress her tyrannical boss quit seeing her useless therapist remember to water her plants and stop having panic attacks in the work toilets But soon she s back to doomscrolling on Instagram necking bottles of Aldi s finest sauvignon blanc and criticising herself with renewed vigour and loathing As her goals seem further away than ever she has to wonder when bad habits feel so good how do you trust what s right for you Praise for *No Hard Feelings* Genevieve Novak will inevitably be compared to other authors but the truth is she is herself and herself alone and that s a good thing Funny biting vulnerable and unflinching Novak s novel is like an ocean dip a bit salty very refreshing Lauren Sams Scaldingly

funny and biting real No Hard Feelings deserves a warning label danger may induce binge reading With her sly wit Genevieve Novak s debut demonstrates a brilliant eye for observing the little things in life which together can be the biggest things of all

Tori Haschka author of Grace Under Pressure No Hard Feelings is a gratifying warm and funny debut Books Publishing Novak has perfectly captured the self doubt and total horror of having to be happy and functional in your twenties It would have you crying into your chipped manicure if it wasn t so darn funny Kimberley Allsopp author of Love and Other Puzzles

Neither The Biggest Or Best Graham Thomas, 2023-12-31 Mostly when we read stories about advertising in the media or in books they concentrate on the big names of the business whether advertisers and their brands agencies or people Yet while they sit at the undoubted glamorous end of the spectrum picking up creative awards and with tales of off screen outrances to spill they represent only the tip of the iceberg in terms of numbers Under the waterline most of the smaller ad agencies were independent a few were the regional subsidiaries of the biggest agencies Saatchi's Dorlands JWT McCann's Royds and Streets all had offices in Manchester for example a few were also second string agencies in London set up by the main agency for a variety of reasons specialist agencies that worked in recruitment finance corporate and business to business advertising for example or to handle conflicting accounts or clients that were too small for the main agency to handle profitably But as Campaign once wrote there is a stigma attached to these agencies They were still seen as second class and on the fringes of the business Rarely did they act as feeder agencies for talent unlike journalism where many leading journalists started their careers on local newspapers before ending up on Fleet Street Even the Chairman of JWT Manchester admitted in the early 80s that Northern advertising people have a bit of a complex about their London counterparts All regional agencies are in danger of being a bit provincial in their outlook This volume looks at those agencies mainly through a diary written in the late 1970s This gives a vivid truthful warts and all portrayal of what life was like in the tail end of the advertising business

The Tech Coup Marietje Schaake, 2025-09-16 A tech insider who has been hailed by The New Yorker for her forceful critique of Big Tech describes what must be done to stop its erosion of democracy Over the past decades under the cover of innovation

technology companies have successfully resisted regulation and have even begun to seize power from governments themselves Facial recognition firms track citizens for police surveillance Cryptocurrency has wiped out the personal savings of millions and threatens the stability of the global financial system Spyware companies sell digital intelligence tools to anyone who can afford them This new reality where unregulated technology has become a forceful instrument for autocrats around the world is terrible news for democracies and citizens In *The Tech Coup* Marietje Schaake offers a behind the scenes account of how technology companies crept into nearly every corner of our lives and our governments She takes us beyond the headlines to high stakes meetings with human rights defenders business leaders computer scientists and politicians to show how technologies from social media to artificial intelligence have gone from being heralded as utopian to undermining the pillars of our democracies To reverse this existential power imbalance Schaake outlines game changing solutions to empower elected officials and citizens alike Democratic leaders can and must resist the influence of corporate lobbying and reinvent themselves as dynamic flexible guardians of our digital world Drawing on her experiences in the halls of the European Parliament and among Silicon Valley insiders Schaake offers a frightening look at our modern tech obsessed world and a clear eyed view of how democracies can build a better future before it is too late *Billboard*, 2010-01-09 In its 114th year Billboard remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends

[Creating the Global Classroom](#) Laurence Peters, 2022-03-10 The book examines how to begin to think like a global educator first by examining how our own histories and experiences have formed our own cultural and professional identities and second how the varied frames by which global education can be understood pedagogical ideological and cosmopolitan have shaped the field Laurence Peters connects theory and practice about global education relevant to cultivating global awareness in primary and secondary students Rather than seeing global education as a special field separate from the other disciplines the author encourages integration of global perspectives into everything we do Showcasing how global awareness is a developmental issue dependent upon the student's ability to step outside of their own place based comfort zone this volume lays out a roadmap of major challenges and issues around instilling this awareness in students This book connects theory and practice about global education relevant to cultivating global awareness in primary

and secondary students From this foundation the book engages with the challenge of integrating global perspectives within a crowded curriculum By convincing students and teachers alike of global education s centrality thinking globally becomes an integral component of learning across subject areas and grade levels and this work encourages students to exercise empathy for the other and to develop critical skills to see through media distortions and fake news so they can better resist the tendency of politicians in our increasingly multicultural countries to divide people along racial and ethnic lines

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren,2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future *Be Happy.
