CUDA Fortran for Scientists and Engineers Gregory Ruetsch, Massimiliano Fatica, 2013-09-11 CUDA Fortran for Scientists and Engineers shows how high performance application developers can leverage the power of GPUs using Fortran the familiar language of scientific computing and supercomputer performance benchmarking The authors presume no prior parallel computing experience and cover the basics along with best practices for efficient GPU computing using CUDA Fortran To help you add CUDA Fortran to existing Fortran codes the book explains how to understand the target GPU architecture identify computationally intensive parts of the code and modify the code to manage the data and parallelism and optimize performance All of this is done in Fortran without having to rewrite in another language Each concept is illustrated with actual examples so you can immediately evaluate the performance of your code in comparison Leverage the power of GPU computing with PGI's CUDA Fortran compiler Gain insights from members of the CUDA Fortran language development team Includes multi GPU programming in CUDA Fortran covering both peer to peer and message passing interface MPI approaches Includes full source code for all the examples and several case studies Download source code and slides from the book's companion website

Image Processing Using FPGAs Donald Bailey, 2019-06-11 This book presents a selection of papers representing current research on using field programmable gate arrays FPGAs for realising image processing algorithms These papers are reprints of papers selected for a Special Issue of the Journal of Imaging on image processing using FPGAs A diverse range of topics is covered including parallel soft processors memory management image filters segmentation clustering image analysis and image compression Applications include traffic sign recognition for autonomous driving cell detection for histopathology and video compression Collectively they represent the current state of the art on image processing using FPGAs

Deep Learning on Embedded Systems Tariq M. Arif, 2025-04-29 Comprehensive accessible introduction to deep learning for engineering tasks through Python programming low cost hardware and freely available software Deep Learning On Embedded Systems is a comprehensive guide to the practical implementation of deep learning for engineering tasks through

computers and embedded hardware such as Raspberry Pi and Nvidia Jetson Nano After an introduction to the field the book provides fundamental knowledge on deep learning convolutional and recurrent neural networks computer vision and basics of Linux terminal and docker engines This book shows detailed setup steps of Jetson Nano and Raspberry Pi for utilizing essential frameworks such as PyTorch and OpenCV GPU configuration and dependency installation procedure for using PyTorch is also discussed allowing newcomers to seamlessly navigate the learning curve A key challenge of utilizing deep learning on embedded systems is managing limited GPU and memory resources This book outlines a strategy of training complex models on a desktop computer and transferring them to embedded systems for inference Also students and researchers often face difficulties with the varying probabilistic theories and notations found in data science literature To simplify this the book mainly focuses on the practical implementation part of deep learning using Python programming low cost hardware and freely available software such as Anaconda and Visual Studio Code To aid in reader learning questions and answers are included at the end of most chapters Written by a highly qualified author Deep Learning On Embedded Systems includes discussion on Fundamentals of deep learning including neurons and layers activation functions network architectures hyperparameter tuning and convolutional and recurrent neural networks CNNs RNNs PyTorch OpenCV and other essential framework setups for deep transfer learning along with Linux terminal operations docker engine docker images and virtual environments in embedded devices Training models for image classification and object detection with classification then converting trained PyTorch models to ONNX format for efficient deployment on Jetson Nano and Raspberry Pi Deep Learning On Embedded Systems serves as an excellent introduction to the field for undergraduate engineering students seeking to learn deep learning implementations for their senior capstone or class projects and graduate researchers and educators who wish to implement deep learning in their research

Parallel Architectures and Bioinspired Algorithms Francisco Fernández de Vega, José Ignacio Hidalgo Pérez, Juan Lanchares, 2012-04-27 This monograph presents examples of best practices when combining bioinspired algorithms with parallel architectures The book includes recent work by leading researchers in the field and offers a map with the main paths already explored and new ways towards the future Parallel Architectures and Bioinspired Algorithms will be of value to both specialists in Bioinspired Algorithms Parallel and Distributed Computing as well as computer science students trying to understand the present and the future of Parallel Architectures and Bioinspired Algorithms

Enabling Real-Time Mobile Cloud Computing through Emerging Technologies Soyata, Tolga, 2015-07-25 Today's smartphones utilize a rapidly developing range of sophisticated applications pushing the limits of mobile processing power The increased demand for cell phone applications has necessitated the rise of mobile cloud computing a technological research arena which combines cloud computing mobile computing and wireless networks to maximize the computational and data storage capabilities of mobile devices Enabling Real Time Mobile Cloud Computing through Emerging Technologies is an authoritative and accessible resource that

incorporates surveys tutorials and the latest scholarly research on cellular technologies to explore the latest developments in mobile and wireless computing technologies With its exhaustive coverage of emerging techniques protocols and computational structures this reference work is an ideal tool for students instructors and researchers in the field of telecommunications This reference work features astute articles on a wide range of current research topics including but not limited to architectural communication components cloudlets infrastructural components secure mobile cloud computing medical cloud computing network latency and emerging open source structures that optimize and accelerate smartphones
