Pacific Northwest Quarterly ,1963 **The Bookmark** ,1952 Colony and Empire William G. Robbins,1994

Popular writers and historians alike have perpetuated the powerful myth of the rugged individualist single handedly transforming the American West In reality William Robbins counters it was the Guggenheims and Goulds the Harrimans and Hearsts and the Morgans and Mellons who masterminded what the West was to become Remove the romance he shows and a darker West emerges a colonial like region where industrial statesmen aided by eastern U S and European capital manipulated investments in pursuit of private gain while controlling wage earning cowboys and miners Robbins argues that understanding the impact of capitalism on the West from the fur trade era to the present is essential to understanding power influence and change in the region Showing how global capitalism had a more profound impact on the modern West than individual initiative he explores violence and racism along the Texas Mexican border colonial style company towns in Montana and the Northwest contrasting traditions astride the U S Canadian boundary pace setting agribusiness and exploitation of labor in California the growing power of metropolitan centers and dependence of rural areas and the emergence of a sizable federal influence To grasp the essence of the West's dramatic transformation Robbins contends you must look to the mainstays of material relations in the region the perpetually changing character of political and economic culture the inherent instability of resources and the larger constellations of capitalist decision making Consequently he shows shy Western success and failure prosperity and misfortune and expansion and decline were all inseparably linked to

the evolution of capitalism at the local regional national and global levels In the tradition of Patricia Nelson Limerick's *Legacy of Conquest* Robbins's study challenges some of our most revered images of the West and invigorates the ongoing debates over its history and meaning for our nation **Big Sky Rivers** Robert Kelley Schneiders,2003 To frame his story Schneiders goes back to the nineteenth century journals of fur traders and settlers and in the record of flora fauna floods and human activity he finds evidence of rapid and disruptive change Bison once had the greatest influence on the land and Schneiders depicts an original bison and Indian trail networks on which were overlaid the first forts and towns and then the railroads highways and reservoirs that reconfigured the region forever **The Nation** ,1946-07 *Red Lodge and the Mythic West* Bonnie Christensen,2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town BOOK JACKET *Creating the West* Gerald D. Nash,1991 This book appears at a time of radical reassessment of what settling the West has meant in American history Amidst questions now being asked about violence and exploitation as leitmotifs in western history it is more important than ever to understand historians and their biases In this interpretive synthesis a major historian argues that the visions of the West held by successive generations of historians were as important as the historical record in shaping their writings **The Journal of American Folklore** ,1945 **Promised Land** Stewart H. Holbrook,1945
