Lapin, 1999-11 Manual for Soviet Mosin-Nagant Ordnance Corps, 1954-05-03 mosin Nagant rule was adoptea In itivi lay imperial mussia me action ca tne rifle was developed by Colonel S I Mosin of the Imperial Russian Army and the magazine was developed by Nagant a Belgian All Soviet bolt action military rifles and carbines are Mosin Nagant weapons and all are basically similar to the original Mosin Nagant rifle adopted by Russia in 1891 These weapons can be considered reasonably effective infantry weapons Fairly good shooting can be done with them at combat ranges although their sights do not lend themselves to the finer degrees of accuracy which can be obtained with similar United States weapons They suffer from an overcomplicated bolt but in other respects are relatively simple to service and maintain The safety in that it is extremely hard to engage and disengage represents a shortcoming of the weapons **Arctic Naval Combat in Support of Ground Operations** Lester Grau, 2025-12-01 Translated to English from the original Soviet General Staff report this is an account of the naval support of the Petsamo Kirkenes Operation in October 1944 the only large scale ground naval and air operation ever fought in the Arctic With additional contemporary supporting material on wider scale Arctic combat including descriptions of combat tactics and weaponry from noted Soviet military scholar James Gebhardt this book provides a comprehensive and detailed

description of the tactics and strategies employed by both Soviet and German forces during the operation from the official Soviet perspective The largest Arctic battle on record involving 133 500 Soviets and 45 000 Germans and Quisling Norwegians the Petsamo Kirkenes Operation sought to liberate the northernmost part of Norway from German occupation during World War II The Soviet navy played a previously unrecognized crucial role in the operation by providing fire support and transportation as well as conducting raids and combat landings on the enemy held coast The harsh Arctic environment including extreme cold ice and limited daylight posed significant challenges to the Soviet and German forces Despite these hardships the Soviet forces achieved their objectives defeated the German Army and successfully liberated the area Arctic Naval Combat in Support of Ground Operations is a powerful companion to Gebhardt s previous translation The Petsamo Kirkenes Operation Soviet Breakthrough and Pursuit in the Arctic October 1944 which details this operation s ground offensive Providing a starting point for the study and understanding of combined arms and services combat in the Arctic an increasingly important and accessible part of the planet where military concerns are rapidly expanding this work is a valuable addition to the literature of World War II military history and a significant additional perspective on the Soviet military

Kangzhan Leland Ness,Bin Shih,2016-09-16 *Kangzhan* Guide to Chinese Ground Forces 1937 45 is the first ready reference to the organization and armament of Chinese ground forces during the Sino Japanese War of 1937 45 The work integrates Chinese Japanese and Western sources to examine the details of the structure and weapons of the period Recent scholarship has contributed greatly to our understanding of China s role in the war but this is the first book to deal with the bottom level underpinnings of this massive army crucial to an understanding of its tactical and operational utility An introductory chapter discusses the military operations in China often given short shrift in World War II histories The work then traces the evolution of the national army s organizational structure from the end of the Northern Expedition to the conclusion of World War II Included are tables of organization and strength reports for the wartime period The armament section illustrates and details not only the characteristics of the many and varied weapons used in China many seen nowhere else but also their acquisition and such local production as was undertaken This is complemented by a chapter on the arsenals and their evolution and production programs The Chinese army was one of the largest of the war and it and Japan s fought longer than any other It faced unique challenges including fragmented loyalties huge expanses of territory poor logistics networks inadequate arms supplies and often incompetence and corruption Nevertheless they fought bravely in major battles through 1941 and were able to counterpunch effectively in important regions through the rest of the war Aimed at both military historians and wargamers this work fills an important gap in our understanding of this the most under appreciated army of the war
