Tiktok Nvidia Gpu In The Us:

Chip War Chris Miller, 2022-10-04 The Financial Times Business Book of the Year this epic account of the decades long battle to control one of the world's most critical resources microchip technology with the United States and China increasingly in fierce competition is pulse quickening a nonfiction thriller The New York Times You may be surprised to learn that microchips are the new oil the scarce resource on which the modern world depends Today military economic and geopolitical power are built on a foundation of computer chips Virtually everything from missiles to microwaves runs on chips including cars smartphones the stock market even the electric grid Until recently America designed and built the fastest chips and maintained its lead as the 1 superpower but America's edge is in danger of slipping undermined by players in Taiwan Korea and Europe taking over manufacturing Now as Chip War reveals China which spends more on chips than any other product is pouring billions into a chip building initiative to catch up to the US At stake is America's military superiority and economic prosperity Economic historian Chris Miller explains how the semiconductor came to play a critical role in modern life and how the US became dominant in chip design and manufacturing and applied this technology to military systems America's victory in the Cold War and its global military dominance stems from its ability to harness computing power more effectively than any other power Until recently China had been catching up aligning its chip building ambitions with military modernization Here in this paperback edition of the book the author has added intriguing new material focused on America's Chip Comeback which overviews the global consequences of the just passed CHIPS Act the new export controls on China and the effort to rally allies to better guard chip technology Illuminating timely and fascinating Chip War is an essential and engrossing landmark study The Times London

Generative AI and Education B. Mairéad

Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications

of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that will resonate with professionals in the sector
