Adolescent Mental Health Megan A. Moreno, Ana Radovic, 2018-03-01 This comprehensive book provides a framework for healthcare providers working with the dual challenges and opportunities presented by the intersection of mental health and technology. Technology and Adolescent Mental Health provides recent evidence based approaches that are applicable to clinical practice and adolescent care with each chapter including a patient case illustrating key components of the chapter contents. Early chapters address the epidemiology of mental health while the second section of the book deals with how both offline and online worlds affect mental health presenting both positive and negative outcomes and focusing on special populations of at risk adolescents. The third section of the book focuses on technology uses for observation, diagnosis or screening for mental health conditions. The final section highlights promising future approaches to technology and tools for improving intervention and treatment for mental health concerns and illnesses. This book will be a key resource for pediatricians, family physicians, internal medicine providers, adolescent medicine and psychiatry specialists, psychologists, social workers as well as any other healthcare providers working with adolescents and mental health care.

How We Practice Therapy Now Chanté D. DeLoach, 2021-08-03 Essential approaches to clinical practice for today's out of office world. Future psychotherapy is not confined to the office; it can be online, virtual, wellness oriented, flexible, racially conscious, and in service of public wellness. COVID 19 has forever changed the landscape of psychotherapy in these ways and in ways we have yet to discover. Practicing psychologist Chant D DeLoach invites readers to reflect on the state of psychotherapy and emerging potentialities forged through crisis. She presents key concepts of telemental health, concierge therapy, and other out of office approaches to psychological well being. DeLoach provides step by step guidance on getting started in telemental health and points to clinical, ethical, and legal considerations for clinicians working in a digital space and other nontraditional formations. Topics covered include how to screen clients for the appropriateness of teletherapy, the required equipment and infrastructure, demystifying the different online platforms, ways to set up a warm and inviting online office, and legal and ethical issues of remote therapy. It also considers business and practice management issues such as what to include in an informed consent for teletherapy. Important discussions of race, intersectionality, and justice in teletherapy round out the book. Readers will be invited to critically reflect on their own identities and comfort in integrating the challenging issues of race, power, and privilege in clinical work. Through interwoven examples and reflective exercises, Dr DeLoach provides tools to support practitioners as they reimagine their clinical identities to meet the needs of today's clients. This book offers keen insights and learning for all clinicians, from trainees to seasoned practitioners who are embarking on this new terrain.
