College Rankings Deal Returns:

Return to Meaning Mats Alvesson, Yiannis Gabriel, Roland Paulsen, 2017 This book argues that we are currently witnessing not merely a decline in the quality of social science research but the proliferation of meaningless research of no value to society and modest value to its authors apart from securing employment and promotion The explosion of published outputs at least in social science creates a noisy cluttered environment which makes meaningful research difficult as different voices compete to capture the limelight even briefly Older more significant contributions are easily neglected as the premium is to write and publish not read and learn The result is a widespread cynicism among academics on the value of academic research sometimes including their own Publishing comes to be seen as a game of hits and misses devoid of intrinsic meaning and value and of no wider social uses whatsoever Academics do research in order to get published not to say something socially meaningful This is what we view as the rise of nonsense in academic research which represents a serious social problem It undermines the very point of social science This problem is far from academic It affects many areas of social and political life entailing extensive waste of resources and inflated student fees as well as costs to tax payers Part two of the book offers a range of proposals aimed at restoring meaning at the heart of social research and drawing social science back address the major problems and issues that face our societies *Return Migration Decisions* Ruth

Achenbach, 2016-10-21 Ruth Achenbach develops a model of individual return migration decision making which examines both the process and the decisive factors in return migration decision making of Chinese highly skilled workers and students in Japan She proposes to answer a question yet insufficiently explained by migration research why do migrants deviate from their migration intentions and return sooner or later than planned or not at all Her study integrates factors from the spheres of career family and lifestyle and redefines stages in long term decision making processes thereby contributing to decision and migration theory She analyzes migrants shifting priorities over the course of migration including a perspective on life course and on the impact of the triple catastrophe of March 11 2011 **Weekly Return of Births and Deaths in London, and in Other Great Towns** , 1878 **Global Rankings and the Geopolitics of Higher Education** Ellen

Hazelkorn, 2016-11-18 Global rankings and the Geopolitics of Higher Education is an examination of the impact and influence that university rankings have had on higher education policy and public opinion in recent years Bringing together some of the most informed authorities on this very complex issue this edited collection of specially commissioned chapters examines the changes affecting higher education and the implications for society and the economy Split into four interrelated sections this book covers The development of rankings in higher education how they have impacted upon both the production of knowledge and its geography and their influence in shaping policymaking Overviews of the significance of rankings for higher education systems in Europe Asia Africa Russia South America India and North America An analysis of rankings in relation to key concerns that pervade contemporary higher education Examination of the role rankings are likely to play in

the future directions for higher education This is a significant scholarly work that analyses in depth an important development in higher education systems and which is likely to have an important influence upon how we understand the higher education policy making process past present and future It provides new analysis and conceptual understanding for researchers and firm evidence for policy makers to use when addressing the value of rankings in measuring the quality of their institutions Besides bringing together a powerful cast of academics this book incorporates contributions from heads of important international higher education organisations from both those involved in making and also in administering key decisions This timely reflective and accessible book forms crucial reading for those studying the subject of rankings as well as the broader implications and unintended consequences of rankings on national higher education policies Extending beyond academic researchers and students this book will also be of significant interest to policymakers higher education leaders and key stakeholders

Report, with Minutes of Evidence, Documents, and Tables and Returns Great Britain. Registrar-general,1871 The Soul of a University Chris Brink,2018-07-01 What is the role of a university in society In this innovative book Chris Brink offers the timely reminder that it should have social purpose as well as achieve academic excellence The current obsession with rankings and league tables has perpetuated inequality and is preventing social mobility This book shows how universities can and should respond to societal challenges and promote positive social change

The Market Oriented University John A Davis,Mark A Farrell,2016-05-27 **Impacts and Outcomes of Global University Rankings** Kayyali, Mustafa,2025-10-15 Global university rankings shape higher education policies institutional strategies and student experiences worldwide These rankings measure and compare universities based on indicators like research output academic reputation and faculty qualifications While rankings can enhance transparency and promote healthy competition they also generate consequences High rankings can attract funding top faculty and international students Meanwhile the pressure may lead institutions to prioritize metrics potentially decreasing teaching quality social impact and equity As their influence grows it becomes important to examine the real impacts and outcomes of global university rankings on higher education systems Impacts and Outcomes of Global University Rankings explores how global university rankings influence institutional behavior resource allocation and policy decisions within higher education It examines the outcomes of these rankings including their effects on academic priorities equity and the student experience across different regions and institutions This book covers topics such as academic reputation internationalization and education quality and is a useful resource for educators policymakers government officials academicians researchers and scientists *Weekly Return of Births and Deaths in London and in Twenty Other Large Towns of the United Kingdom* Registrar General,1872 *Rankings and Accountability in Higher Education: Uses and Misuses* Priscilla Toka Mmantsetsa

Marope, Peter J. Wells, Unesco, Ellen Hazelkorn, 2013-01-01 The growing impact of university rankings on public policy and on students' choices has stirred controversy worldwide. This unique volume brings together the architects of university rankings and their critics to debate the uses and misuses of existing rankings. With voices from five continents, it provides a comprehensive overview of current thinking on the subject and sets out alternative approaches and complementary tools for a new era of transparent and informed use of higher education ranking tables. **Human Capital** Gary S.

Becker, 2009-05-15 Human Capital is Becker's classic study of how investment in an individual's education and training is similar to business investments in equipment. Recipient of the 1992 Nobel Prize in Economic Science, Gary S. Becker is a pioneer of applying economic analysis to human behavior in such areas as discrimination, marriage, family relations, and education. Becker's research on human capital was considered by the Nobel committee to be his most noteworthy contribution to economics. This expanded edition includes four new chapters covering recent ideas about human capital, fertility, and economic growth; the division of labor; economic considerations within the family; and inequality in earnings. Critics have charged that Mr. Becker's style of thinking reduces humans to economic entities. Nothing could be further from the truth. Mr. Becker gives people credit for having the power to reason and seek out their own best destiny. Investing in College Malcolm GETZ, 2009-06-30 College education is one of the most important investments a family will make But between the viewbooks websites insider gossip and magazine rankings students and their worried parents face a dizzying array of options What do the rankings really mean Is it wise to choose the most prestigious school a student can get into What are the payoffs of higher education and by the way how do we pay for them In a unique approach to these conundrums an economist and award winning teacher walks readers through the opportunities risks and rewards of heading off to college Warning against the pitfalls of numerical rankings Malcolm Getz poses questions to guide a student toward not necessarily the best college but the right one Famous professors suggest quality but do they teach undergraduates Are smaller classes always better When is a state university the best deal around In a concise overview of decades of research Getz reviews findings on the long term returns of college education in different careers from law to engineering from nursing to financial management Sorting through personal professional and institutional variables he helps families determine when paying 40 000 a year might make sense and when it merely buys an expensive rear window decal He breaks down the formidable admissions game into strategies to improve the odds of acceptance and he offers tips on tax breaks subsidized loans federal grants 529 accounts merit scholarships and much more Shrewd and sensible Investing in College is an invaluable resource and a beacon of sanity for college bound students and the families who support them

Global University Rankings and the Mediatization of Higher Education Michelle Stack, 2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy

Perspectives on the Internationalisation of Higher Education David Law, Michael Hoey, 2018-04-19 Internationalisation of the contemporary university has become a pervasive and powerful development theme during the past three decades In many countries higher education is now a major

export industry The UK has longstanding experience of overseas student recruitment international partnerships between universities and trans national education It has led the world in the development of the quality assurance of overseas activities This collection of essays brings together articles published in the journal of the UK Association of University Administrators AUA Several of the pieces are members of AUA whilst others are by authors who work in other countries Overall in this volume there is a practitioner focus that provides the reader with lessons learnt by those with experience of implementing policies to promote the internationalisation of higher education We are interested both in how universities can manage the challenges that they face and in how the experience of students can be enhanced by participation in internationalisation Because the AUA has an enduring commitment to the professionalization of management and administration readers of this anthology will find accessible focussed and brief articles that are solution oriented This book was originally published as a special issue of Perspectives Policy and Practise in Higher Education
