Architecture and Freedom
Owen Hopkins, 2018-05-29 Architects are facing a crisis of agency. For decades they have seen their traditional role diminish in scope as more and more of their responsibilities have been taken over by other disciplines within the building construction industry. Once upon a time we might have seen the architect as the conductor of the orchestra; now he or she is but one cog in a vast and increasingly complex machine. In an attempt to find a way out of this crisis, there is growing debate about how architects might reassert the importance of their role and influence. On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline. On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline's core mission of advancing social progress and promoting the public good, and at the same time the scope of their traditional disciplinary remit. At root, this question is fundamentally about freedom: about whether architects still possess it if they have ever done, and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice. Presenting a variety of views and perspectives, this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century. Contributors include Phillip Bernstein, Peggy Deamer, Adam Nathaniel Furman, Kate Goodwin, Charles Holland, Anna Minton, Patrik Schumacher, Alex Scott, Whitby Ines Weizman, and Sarah Wigglesworth. Featured architects: Atelier Kite, Scott Whitby Studio, C+S Architects, Anupama Kundoo, Noero Architects, Umbrellium, and Zaha Hadid Architects.

Worldmodelling
Mark Morris, Mike Aling, 2021-06-08 In light of current developments in modelling and with the aim of reinvigorating debates around the potentiality of the architectural model, its philosophies, technologies, and futures, this issue of AD examines how the model has developed to become an immersive worldbuilding machine. Worldbuilding is the creation of imaginary worlds through forms

of cultural production Although this discourse began with an analysis of imaginary places constructed in works of literature it has evolved to encompass worlds from fields such as cinema games design landscape urbanism and architecture Worldbuilding differs from the notion of worldmaking which deals with how speculative thinking can influence the construction of the phenomenal world As architects postulate ever increasingly complex world models from which to draw inspiration and inform their practice questions of scale representation and collaboration emerge Discussed through a range of articles from acclaimed international contributors in the fields of both architecture and media studies this issue explores how the architectural model is situated between concepts of worldbuilding and worldmaking in the creative space of worldmodelling Contributors Kathy Battista Thea Brejzek and Lawrence Wallen Pascal Bronner and Thomas Hillier Mark Cousins James A Craig and Matt Ozga Lawn Kate Davies Ryan Dillon Christian Hubert Chad Randl Theodore Spyropoulos and Mark JP Wolf Featured architects Phil Ayres FleaFolly Architects Minimaforms and Stasus **AHMM** Neil

Spiller,2021-05-10 AHMM is a premier international architectural practice Established over 30 years ago it has won numerous awards including the Stirling Prize Through the contributions of journalists clients fellow professionals and academics this AD issue celebrates the practice s achievements in all areas of architectural production featuring archive material new works and unparalleled access to the AHMM organisation revealing new insights into their work and urban philosophies To get to this eminent position the office has consistently responded in innovative and imaginative ways to the changing imperatives of art science and economics that influence our built environment These parameters have metamorphosed considerably since AHMM was founded in terms of advances in digitisation material science and changes to contract management what constitutes sustainability procurement routes construction methods collaboration and architectural education Above all this AD will explore AHMM s practice as a holistic design project in itself in terms of building buildings but also in using a design ethos to cope with shifts in workload and the firm s varying business activities and its administration over the years thus providing insight for a future generation of potentially successful architectural professionals Emerging Talents Neil Spiller,2021-09-27 There is a newfound interest in architectural education This AD is a survey of some of the best contemporary architecture student work in the world The most forward looking architecture schools worldwide are reinventing pedagogy in the hope of developing radical syllabi that are a rich mix of the virtual and the actual Design education is changing and adapting to compensate for the new material changes to the discipline and is being used to disentangle old outmoded spatial practices and replace them with new paradigms of space and representation This issue showcases the students and teachers who are pushing the envelope of architecture in extraordinary ways offering their insights into its future materiality and spatial dexterity It premieres a new young generation of architects who are likely to become names in the architectural profession and possibly important teachers themselves Their work has been selected by their own influential teachers of architecture who describe the studio methodologies and reasons for them that prompted the
