old cedar and discovers that passing on this intimate local knowledge the knowledge of home is a kind of rare and valuable love Bass emerges not just as a writer but as a father a neighbor and a gifted observer uniquely able to bring us close to the drama and sanctity of small things ensuring that though the wilderness is increasingly at risk the voice of the wilderness will not disappear A work of wonder praise and thanksgiving for all the marvels of nature where every aspect is connected and every process has its place Bass grounding his book in science well takes the facts and transforms them as a musician transforms musical notes into a work of great beauty This walk through a year is a walk through the author's soul filled with passions dreams fears and the exuberance of Walt Whitman School Library Journal starred review Whether the topic is a forest fire in his front yard or the excitement of the first tiny cheerful glacier lilies in spring Rick Bass is a stirring companion on the trail that leads west from the Walden Pond of Henry David Thoreau and the Sand County of Aldo Leopold Ivan Doig author of *The Whistling Season* **Yellowstone to Yukon** Florian Schulz, 2008-03-01 It's not only a feast for the eye Florian Schulz is a fine young nature wildlife photographer but a challenge to those of us who live in a not yet used corner of the planet Seattle P I A grizzly bear emerges one small detail in an immense vista of field and mountains and sky A shoreline still and empty but for the telltale tracks of passing wildlife Golden peaks that roll to the horizon starkly beautiful in the morning light This kind of space of solitude of simple wildness still exists in North America outside the boundaries of any park Photographer Florian Schulz documents the landscape plants animals and people of an eco system that is surprisingly intact up and down the spine of the Rocky Mountains There is still time to make a difference to direct the path of encroaching development and establish connections between the national and provincial parks on this course Essay contributors including David Suzuki David Quammen Rick Bass Ted Kerasote and Roberts F Kennedy Jr tell of their travels through the region and their experience of the land They explain the need for Y2Y based on new findings that reveal isolated nature sanctuaries to be a recipe for extinction They set the Y2Y conservation program in context a grand vision grounded on science a practical plan that provides for economic as well as environmental sustainability a blueprint designating critical wildlife habitat Environmental conservation does not mean that humans must be excluded from the land but we must act thoughtfully For more information about the author visit his web site at www.visionsofthewild.com *Fur News and Outdoor World*, 1929

Jones,2019-11-11 In Wild Capital Barbara Jones demonstrates that looking at nature through the lens of the marketplace is a surprisingly effective approach to protecting the environment Showing that policy makers and developers rarely associate wild places with monetary values Jones argues that nature can and should be viewed as a capital asset like

any other in order for environmental preservation to be a competitive alternative to development Jones describes how the ecosystem services model a tool that connects human well being with the services nature provides can play a critical role in assigning species and their habitats measurable values She uses five highly recognizable animal species moose manatees sharks wolves and bald eagles as examples to show how highly valued charismatic fauna can serve as symbolic representations of entire ecosystems at risk Through an emphasis on branding incentives and ecotourism Jones advocates for channeling the social and economic power of these and other faces of nature to inspire greater environmental awareness and stewardship Contending that many people don t realize how fiscally pragmatic environmental initiatives can be Jones is optimistic that by recognizing the costs of habitat destruction and diminished biodiversity we will make better choices regarding conservation and development In doing so we can more readily move toward co existence with nature and a sustainable future
