A Dream Deferred Howard Karger, 2017-07-28 From its inception in the late nineteenth century social work has struggled to carry out the complex sometimes contradictory functions associated with reducing suffering enhancing social order and social reform Since then social programs like the implementation of welfare and the expansion of the service economy which should have augured well for American social work instead led to a continued loss of credibility with the public and within the academy *A Dream Deferred* chronicles this decline of social work attributing it to the poor quality of professional education during the past half century The incongruity between social work's promise and its performance warrants a critical review of professional education For the past half century the fortunes of social work have been controlled by the Council of Social Work Education which oversees accreditation of the nation's schools of social work Stoesz Karger and Carrilio argue that the lack of scholarship of the Board of Directors compromises this accreditation policy Similarly the quality of professional literature suffers from the weak scholarship of editors and referees The caliber of deans and directors of social work educational programs is low and graduate students are ill prepared to commence studies in social work Further complicating this debate the substitution of ideology for academic rigor makes social work vulnerable to its critics The authors state that since CSWE is unlikely to reform social work education schools of social work should be free to obtain accreditation independently and they propose criteria for independent accreditation *A Dream Deferred* builds on the past presents a bracing critique of the present and proposes recommendations for a better future that cannot be ignored or dismissed

College Education Version 3.0 Lisa Guernsey, 1999

Momentum Daniel Seymour, 2015-12-07 An era of accountability has swept over the higher education landscape Everyone it seems legislatures think tanks newspapers magazines books and bloggers wants to hold colleges and universities accountable They are attaching strings to budgets producing reports that read like exposés developing clever systems to rank and sort us and writing books and articles that describe the end of college as we know it According to them we need to be reformed reimagined and rebooted *Momentum* changes the conversation from how others are holding higher

education accountable to why colleges and universities need to embrace the need to demonstrate their own responsibility. The responsibility paradigm that emerges fundamentally shifts the dialogue from fixing to preventing from reacting to creating from surviving to thriving. To implement this new paradigm the dynamics of virtuous cycles are introduced and described. These upward spirals build on their own successes and result in growing confidence, a sense of vitality and resilience. The future of these institutions isn't the result of outside pressure or reformers. The future is something that can and should be created by those who take responsibility for it.

The Student Loan Mess Joel Best, Eric Best, 2014-05-02. Student loan debt in the U.S. now exceeds 1 trillion more than the nation's credit card debt. This timely book explains how and why student loans evolved, the concerns they've raised along the way, and how each policy designed to fix student loans winds up making things worse. The authors, a father and son team, provide an intergenerational interdisciplinary approach to understanding how over the last 70 years Americans incrementally, with the best intentions, created our current student loan disaster. They examine the competing interests and shifting societal expectations that contributed to the problem and offer recommendations for confronting the larger problem of college costs and student borrowing in the future.

Runaway Capitalism James H. Mittelman, 2025-11-26. Algorithms and artificial intelligence increasingly drive our lives; cognitive inputs supplant physical inputs in the workplace, and big philanthropies rather than governments tackle many societal problems. To examine any one of these interrelated trends alone is to miss a seismic shift in world order. By homing in on the confluence of algorithmic capitalism, cognitive capitalism, and philanthropic capitalism, this tightly argued book offers a novel interpretation of an unnoticed and understudied transformation. The three forces form a trialectic, a system that lacks effective controls and is spreading globally. Conducted on four continents, the research shows how runaway capitalism is making work and daily life ever more precarious and sparking anti-precarity movements. Tracing these metamorphoses both in the global North and global South, the author identifies plausible scenarios for blunting the sharp edges of runaway capitalism. Based on hard empirical data and qualitative case studies in the global North and South, *Runaway Capitalism* is aimed at a wide readership. Written in vivid prose, it is appropriate for university students, researchers, policy intellectuals, and a general audience interested in how to address major perils in geopolitics and economics.

Financing American Higher Education in the Era of Globalization William Zumeta, David W. Breneman, Patrick M. Callan, Joni E. Finney, 2021-02-23. This ambitious book grows out of the realization that a convergence of economic, demographic, and political forces in the early twenty-first century requires a fundamental reexamination of the financing of American higher education. The authors identify and address basic issues and trends that cut across the sectors of higher education, focusing on such questions as how much higher education the country needs for individual opportunity and for economic viability in the future, how responsibility for paying for it is currently allocated, and how financing higher education should be addressed in the future.
