[Rethinking Reference and Instruction with Tablets](#) Rebecca K. Miller,Carolyn Meier,Heather Moorefield-Lang,2014-01-01 In this issue of Library Technology Reports Virginia Tech librarians Miller Meir and Moorfield Lang offer a collection of first

hand accounts of academic library projects using tablets

Embodied Learning and Teaching Using the 4E Cognition

Approach Theresa Schilhab, Camilla Groth, 2024-05-30 This book operationalises the new field EmLearning that integrates embodiment and grounded cognition perspectives with education using the 4E approach as a guiding principle which suggests that cognition is embodied embedded enacted or extended Chapters highlight empirical data providing readers with research based insight into the theoretical foundations of embodied cognition in learning illustrated by practical examples Ultimately the volume contributes a radical understanding of embodied cognition demonstrating the importance of the field to the educational system more broadly and suggesting a fundamental change to the way learning education and curriculum design are viewed and considered Based on contemporary scientific findings the book addresses the educational area with a focus on opening the embodied approach to a wider audience that will circulate the new knowledge and support their educational practices Written with the purpose of contributing to a broad spectrum of academic educational fields this book will be of use to postgraduates researchers and academics in the fields of higher education educational psychology teacher education and teaching methodology and practice Teachers and school politicians should also benefit from this volume more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Teleophthalmology in Preventive

Medicine Georg Michelson, 2014-11-26 This book provides an up to date overview of the clinical applications methods and technologies of teleophthalmology within the field of preventive medicine The ability of novel methods to detect the initial signs of neurodegenerative diseases on the basis of alterations in the retina is reviewed and detailed attention is paid to the role of teleophthalmology in screening for vision threatening diseases such as diabetic retinopathy glaucoma and age related macular degeneration A major part of the book is devoted to novel imaging methods and the latest information technologies including advanced mobile communication and Web 2 0 applications in teleophthalmology In addition the initial projects of an interdisciplinary cooperation in preventive medicine are described All of the authors are experienced in the scientific and practical aspects of teleophthalmology including e learning and have produced a book that will meet the needs of all medical care providers interested in using teleophthalmology

Seven Mobile Apps in Seven Weeks

Tony Hillerson, 2016-08-01 Answer the question Can we build this for ALL the devices with a resounding YES Learn how to build apps using seven different platforms Mobile Web iOS Android Windows RubyMotion React Native and Xamarin Find out which cross platform solution makes the most sense for your needs whether you re new to mobile or an experienced developer expanding your options Start covering all of the mobile world today Understanding the idioms patterns and quirks of the modern mobile platforms gives you the power to choose how you develop Over seven weeks you ll build seven different mobile apps using seven different tools You ll start out with Mobile Web develop native apps on iOS Android and Windows and finish by building apps for multiple operating systems using the native cross platform solutions RubyMotion React Native and Xamarin For

each platform you'll build simple but non-trivial apps that consume JSON data, run on multiple screen sizes or store local data. You'll see how to test, how to build views and how to structure code. You'll find out how much code it's possible to share, how much of the underlying platform you still need to know and ultimately you'll get a firm understanding of how to build apps on whichever devices your users prefer. This book gives you enough first-hand experience to weigh the trade-offs when building mobile apps. You'll compare writing apps on one platform versus another and understand the benefits and hidden costs of cross-platform tools. You'll get pragmatic hands-on experience writing apps in a multi-platform world. What You Need: You'll need a computer and some experience programming. When we cover iOS, you'll need a Mac and when we cover Windows Phone, you'll need a computer with Windows on it. It's helpful if you have access to an iPhone, Android phone and Windows Phone to run the examples on the devices where mobile apps are ultimately deployed, but the simulators or emulator versions of those phones work great.

On the Edge of the Panel Julio Cañero, Esther Claudio, 2015-09-04 To create a comic is not to illustrate words but to create narrative diagrams and transform strokes into imaging words. The infinite array of possibilities that the merging of text and pictures provides is a garden of forking paths that critics have just started to explore. This is an art that operates at the crossroads of various disciplines but whose specifications require a thorough understanding of its unique mechanisms. The explosion of experimental works and the incorporation of previously marginal or nonexistent genres and themes in comics have enriched an already fruitful art in ways that continue to surprise both readers and critics. This collection of essays offers a space of reflection on the cultural, social, historical and ideological dimensions of comics. With this in the background, the book focuses on three main areas: the origins and definitions of comics, the formal tools of the medium and authors and their works. The historical and formal approach to comics as shown here is still essential and the debate about the origins and definition is still present, but two-thirds of this collection formulate other treatments that scholars had not started to tackle until recently. Does this mean that the study of comics has finally reached the necessary confidence to abandon the artistic legitimization of the medium? Or are they just new self-defense mechanisms through alliances with other fields of academic interest? This book will add to the debate on comics as did the international conference that led to it. It provides a channel of communication with an art, a two-headed medium that like the god Janus operates as a hinge, as a meeting point, as a bridge between pictorial and literary expression.

Postdevelopmental Approaches to Digital Arts in Childhood Marissa McClure Sweeny, Mona Sakr, 2025-01-23 This book deconstructs traditional developmentalist logic around children's engagement with digital media where the focus is on what the digital does to children's bodies and brains. Rather than seeing children as vulnerable and passive recipients, the authors position children as co-creators and digital artists embracing the richness of children's digital play. The chapters cover a wide range of topics including indigenous digital art, digital drawing, learning to code, social media and artificial intelligence. The authors use a diverse range of theoretical perspectives including posthumanism, feminist new materialism, social semiotics, socialcultural

and multimodal approaches to childhood to generate new ways of seeing the relationship between children and the digital. The book includes chapters from academics and practitioners based in Australia Canada Sweden the UK and the USA and a companion website showcasing innovative and interactive material including visual essays and soundscapes *The Weekly Exchange Volume Three* D Edward Ennis, Steve T Harding, 2014-10-22 Volume 3 of the ongoing Weekly Exchange project between D Edward Ennis and Steve T Harding

Person-Centered Memory and Communication Interventions for Dementia Ellen M. Hickey, Natalie F. Douglas, 2021-03-19 Person Centered Memory and Communication Interventions for Dementia A Case Study Approach is the third volume in the Medical Speech Language Pathology book series It is a practical peer reviewed resource for speech language pathologists SLPs working with people with dementia In this unique text the authors cover a variety of evidence based clinical procedures for the memory communication and behavioral challenges of people with dementia The aim is to empower SLPs and other clinicians to implement practices that elevate the personhood of people living with various dementia syndromes Throughout this clinician friendly text the authors cover three main areas of focus elevating personhood the how tos of clinical procedures and the organizational level barriers and facilitators to implementation After an introductory chapter the next eight chapters describe a detailed case study that explains specific person centered assessment and treatment methods The cases depict a diverse group of people providing insights into the range of concerns and joys involved in supporting memory and communication in a manner that is culturally responsive and equitable Key Features The only dementia text that incorporates a culturally responsive approach to cases that reflect the increasing diversity of the aging population Specific examples of the how tos of person centered evidence based care Detailed personal assessment and treatment histories for each case with a table of goals and intervention procedures as well as illustrations of memory and communication strategies Each chapter starts with an At A Glance section to highlight the person and ends with a summary of key points of the treatment and implementation factors Uses a highly readable writing style with boxes tables and figures to support the text

[The Oxford Handbook of Music Therapy](#) Jane Edwards, 2017 Music therapy is growing internationally to be one of the leading evidence based psychosocial allied health professions to meet needs across the lifespan The Oxford Handbook of Music Therapy is the most comprehensive text on this topic in its history It presents exhaustive coverage of the topic from international leaders in the field
