they do not follow the standard rules of spelling The child has to memorize sight words as a whole by sight so that they recognize them immediately without having to decode the spelling The problem is that minimal instruction is given by teachers and parents Often little more is done than showing the word to the child and telling them what it is However for many children this is not nearly enough As a result their reading and comprehension of these crucial words is lacking which significantly brings down their overall reading ability Scholdener s Sight Word Workbook is the solution A Multi Dimensional Approach Educational research has shown that the best technique for learning sight words is accurate writing and spelling of the word comprehension of its use in a simple sentence and a visual representation of the phrase to reinforce how the word is used in context Scholdener s Sight Word Workbook is the only workbook that uses this multi dimensional model for each and every one of its 200 words This ensures that the child really grasps the sight word along with its spelling meaning and usage In teaching terms giving your child the opportunity to learn words in proper context is known as meaningful reading This is an extremely effective tool that has been shown to be far superior for retention than plain memorization or rote learning Includes Dolche Word List Educator Dr Edward William Dolch developed the Dolch Sight Words List by studying the most frequently occurring words in children s books These words comprise a staggering 80% of the words you would find in a standard children s book Once a child knows this list of words it makes reading much easier You ll be pleased to know that this workbook incorporates the key Dolch words Book Details 8 5 x 11 Large size provides plenty of room for writing inside 200 sight words TWICE as many as other workbooks More than 100 pages of writing exercises From trusted education publisher Scholdeners Made in the USA If you want to boost your child s language skills scroll up and click Add to Cart now

Sight Word Readers Kita book,2017-11-23 Sight word acquisition is an important building block in the construction of a child s ability to read Once she is able to read all of the words on Dolch s lists for example she has access to up to 75% of what is printed in almost any piece of children s literature How exactly do teachers and parents help children develop their stores of sight words There are several proven techniques that any adult can use to teach sight words Whichever strategies are employed the best success is seen when one adult with a small number of children at a time The more one on one time a child has learning and practicing sight words with an adult the greater his chances to integrating

them into his long term memory

Teaching Sight Words With Pictures

Many learners think in pictures. Whether we realize it or not we often visualize what we are attempting to learn to help solidify the information in our memories. Think about the last time you needed to get somewhere you hadn't been before. Even if you used written directions instead of a pictorial map you probably had a number of visual markers such as unusual sights or signs to help you learn how to get there. Presenting children with illustrations of sight words along with their print versions helps them make important connections between the object and the word. Flashcards or posters with a colorful picture and the word written under it are excellent sight word teaching tools. In addition teachers or parents can have children draw their own pictures of each word on the same page to help them link the print with the visual.

Listening to and Saying Sight Words

Sight words are not only frequently used in writing they are also essential to conversational English. Because most of the Dolch sight words are already in children's verbal vocabularies learning to read them is simply a matter of connecting the print word to the oral version in their prior knowledge banks. Parents and teachers should make explicit connections between the print version of a word and its sound. Pointing to a word while repeating it is one way to do this. Also adults should have children say the sight words to help them become actively involved in their learning. This can be as simple as asking them to repeat a sight word while writing it or as involved as having the child search through a pile of sight words written on index cards or sentence strips to find a word that best completes a sentence you have written.

Teaching Sight Words Through Repetition

Children do not learn new words by being exposed to them only once. Repetition is key to sight word acquisition. Young readers should be given opportunities to read and write a new sight word multiple times. Repetitive reading of texts featuring certain sight words is one strategy for helping children commit these words to memory. Also to practice spelling sight words parents and teachers can have children write and say aloud words several times. When a child writes and says the word at least five times in a row she is more likely to commit it to memory. To subtly help children mentally repeat sight words parents or teachers can create Dolch word walls. As a new sight word is learned it is written in large print on a sentence strip or piece of paper and hung up on the wall in a location where the child is likely to see it often. Not only will repetitive glancing at the word reinforce it in the child's memory it is also easily accessible for the parent or teacher to refer to when talking with the child about it.

Sight Words in Context

When children see words used in natural ways rather than in isolation they are more likely to remember them because they develop an understanding of the word's significance and meaning. The ebook has 50 sight word phrases with lovely pictures. Wish your parents a happy fruitful time with their dear children.
