An Introduction to Artificial Intelligence in Education Shengquan Yu, Yu Lu, 2021-11-29 This book systematically reviews a broad range of cases in education that utilize cutting edge AI technologies Furthermore it introduces readers to the latest findings on the scope of AI in education so as to inspire researchers from non technological fields e g education psychology and neuroscience to solve education problems using the latest AI techniques It also showcases a number of established AI systems and products that have been employed for education Lastly the book discusses how AI can offer an enabling technology for critical aspects of education typically including the learner content strategy tools and environment and what breakthroughs and advances the future holds The book provides an essential resource for researchers students and industrial practitioners interested and engaged in the fields of AI and education It also offers a convenient handbook for non professional readers who need a primer on AI in education and who want to gain a deeper understanding of emerging trends in this domain

Hands-On Artificial Intelligence on Amazon Web Services Subhashini Tripuraneni, Charles Song, 2019-10-04 Perform cloud based machine learning and deep learning using Amazon Web Services such as SageMaker Lex Comprehend Translate and Polly Key Features Explore popular machine learning and deep learning services with their underlying algorithms Discover readily available artificial intelligence AI APIs on AWS like Vision and Language Services Design robust architectures to enable experimentation extensibility and maintainability of AI apps Book Description From data wrangling through to translating text you can accomplish this and more with the artificial intelligence and machine learning services available on AWS With this book you ll work through hands on exercises and learn to use these services to solve real world problems You ll even design develop monitor and maintain machine and deep learning models on AWS The book starts with an introduction to AI and its applications in different industries along with an overview of AWS artificial intelligence and machine learning services You ll then get to grips with detecting and translating text with Amazon Rekognition and Amazon Translate The book will assist you in performing speech to text with Amazon Transcribe and Amazon Polly Later you ll discover the use of Amazon Comprehend for extracting information from text and Amazon Lex for building voice chatbots You will also understand the key capabilities of Amazon SageMaker such as wrangling big data discovering topics in text collections and classifying images Finally you ll cover sales forecasting with deep learning and autoregression before exploring the importance of a feedback loop in machine learning By the end of this book you will have the skills you need to implement AI in AWS through hands on exercises that cover all aspects of the ML model life cycle What you will learn Gain useful insights into different machine and deep learning models Build and deploy robust deep learning systems to production Train machine and deep learning models with diverse infrastructure specifications Scale AI apps without dealing with the complexity of managing the underlying infrastructure Monitor and Manage AI experiments efficiently Create AI apps using AWS pre trained AI services Who this book is for This book is for data scientists machine

learning developers deep learning researchers and artificial intelligence enthusiasts who want to harness the power of AWS to implement powerful artificial intelligence solutions A basic understanding of machine learning concepts is expected

AI Prompts Master Guide: 2000+ Ready-to-Use Prompts for Every Creator, Founder & Professional Shreekant Pratap Singh, 2025-11-07 Welcome to the AI revolution powered by your words This book isn't about theory it's about action Inside *AI Prompts Master Guide* you'll find 2 000 proven prompts that unlock the full potential of tools like ChatGPT Gemini Midjourney Notion Zapier Canva and more helping you create automate and earn like never before Each section of this eBook is designed to make you think act and build faster with AI no coding required What You'll Get Inside 2 000 categorized prompts for content creation marketing design business automation research Step by step templates for writing branding video and presentation generation Prompts to build full workflows in Notion Zapier Make and Google Sheets Real world business monetization and AI education blueprints Bonus section with 50 daily practice prompts 25 free AI tools for 2025 Who This Book Is For Creators Influencers who want to build viral content and boost engagement Entrepreneurs Founders looking to scale with AI powered workflows Students Educators aiming to learn or teach prompt engineering Freelancers Professionals ready to earn online with AI skills Why You Need This AI isn't replacing you it's amplifying you The person who knows how to talk to AI will always stay ahead Each prompt in this guide is like a digital switch turn it on and your ideas become output instantly The era of coding is over The era of prompting has begun Transform your creativity speed up your workflow and join the new class of AI native creators one prompt at a time ABOUT THE AUTHOR Shreekant Pratap Singh Gen AI Subject Matter Expert Founder Director Technosys IT Management Pvt Ltd With 10 years of expertise in Sales Business Development and AI Automation Shreekant has built multiple ventures across technology solar energy marketing and creative production He has trained teams designed lead generation systems and developed AI driven solutions that empower entrepreneurs worldwide Known for his practical easy to apply AI frameworks Shreekant helps individuals and brands turn AI from a tool into a growth engine Blog www.technosysblogs.com

No-Code Artificial Intelligence Ambuj Agrawal, 2023-03-07 A practical guide that will help you build AI and ML solutions faster with fewer efforts and no programming knowledge KEY FEATURES Start your journey to become an AI expert today Learn how to build AI solutions to solve complex problems in your organization Get familiar with different No code AI tools and platforms DESCRIPTION No Code Artificial Intelligence is a book that enables you to develop AI applications without any programming knowledge Authored by the founder of AICromo <https://aicromo.com> this book takes you through an array of examples that shows how to build AI solutions using No code AI tools The book starts by sharing insights on the evolution of No code AI and the different types of No code AI tools and platforms available in the market The book then helps you start building applications of Machine Learning in Finance Healthcare Sales and Cybersecurity It will also teach you to create AI applications to perform sales forecasting find fraudulent claims and detect diseases in plants Furthermore the book will show how to build Machine

Learning models for a variety of use cases in image recognition video object recognition and data prediction After reading this book you will be able to build AI applications with ease WHAT YOU WILL LEARN Use different No code AI tools such as AWS Sagemaker DataRobot and Google AutoML Learn how to create a Machine Learning model to predict housing prices Build Natural Language Processing NLP models for Healthcare information Identification Learn how to build an AI model to create targeted customer offerings Use traditional ways to perform AI implementation using programming languages and AI libraries WHO THIS BOOK IS FOR This book is for anyone who wants to build an AI app without writing any code It is also helpful for current and aspiring AI and Machine Learning professionals who are looking to build automated intelligent and smart AI based solutions TABLE OF CONTENTS 1 What is AI 2 Getting Started with No Code AI 3 Building AI Model to Predict Housing Prices 4 Classifying Different Images 5 Building AI Model to Perform Sales Forecasting 6 Building AI Model to Find Fraudulent Claims 7 Building AI Model to Detect Diseases in Plants 8 Building AI Model to Create Targeted Customer Offerings 9 Building AI Model for Healthcare Information Identification 10 Building AI Model for Video Action Recognition 11 Building AI Applications with Coded AI

IBM Power11 Scale-Out Servers: Introduction and Overview Tim Simon, Henry Vo, Larry Bolhuis, David Harlow, Jean-Manuel Lenez, Jaqui Lynch, Michael Miller, Dean Mussari, Steve Palazzolo, Gerd Reinhardt, IBM Redbooks, 2025-10-29 IBM Power11 scale out servers are designed to meet the evolving demands of modern enterprises They offer an integrated end to end infrastructure stack that delivers high performance robust security and operational agility These systems support autonomous IT operations ITOps helping organizations reduce risk streamline management and accelerate innovation across hybrid and multicloud environments With a strong focus on business continuity Power11 processor based servers provide zero planned downtime ZPD for maintenance automated failover by using spare processor cores and rapid ransomware detection and recovery through IBM Power Cyber Vault These servers also improve productivity and efficiency by simplifying infrastructure operations and supporting flexible consumption models such as Capacity on Demand CoD and Power Enterprise Pools PEP 2 0 Power11 scale out servers are designed for the future with quantum safe security capabilities They include advanced cryptographic protections such as Secure Boot and Live Partition Mobility LPM which are hardened against quantum era threats The servers also support the latest FIPS 140 3 certified cryptographic modules helping safeguard sensitive data and ensure long term compliance in a complex threat landscape For organizations adopting artificial intelligence AI Power11 processor based servers are AI ready by design They feature built in hardware acceleration for machine learning and inferencing workloads Their seamless integration with IBM Cloud enables rapid scaling and consistent performance enabling enterprises to deploy new applications and AI use cases with confidence This IBM Redbooks publication provides a hardware architecture analysis and highlights the changes new technologies and major features that are introduced in these systems This publication is intended for the following professionals seeking a deeper understanding of IBM Power server products IBM Power customers Sales and marketing

professionals Technical support professionals IBM Business Partners Independent software vendors ISVs This book expands the IBM Power documentation set by offering a desktop reference with a detailed technical description of the Power11 scale out server models

Artificial Intelligence Tools Book Manish Soni, 2024-11-13 Welcome to the exciting and rapidly evolving world of artificial intelligence AI This book Artificial Intelligence Tools Unlocking the Power of Intelligent Systems is designed to be your comprehensive guide to understanding implementing and leveraging the cutting edge tools that drive the advancements in AI Whether you are a seasoned professional in the field or a curious newcomer this book aims to provide you with valuable insights and practical knowledge to navigate the multifaceted landscape of AI tools From machine learning algorithms to neural networks readers will gain insights into the core concepts that form the backbone of intelligent systems We aim to make complex ideas accessible ensuring that readers regardless of their technical background can grasp the essentials of AI Furthermore we recognize the ethical implications and societal considerations surrounding AI In a dedicated section we address the responsible use of AI tools discussing issues such as bias in algorithms transparency and accountability It is crucial for individuals working with AI to understand the ethical dimensions of their work and strive towards the development of AI systems that align with human values and promote inclusivity In addition to the technical aspects this book emphasizes the importance of continuous learning and adaptation in the rapidly evolving field of AI The final sections explore emerging trends such as reinforcement learning autonomous systems and AI driven creativity offering readers a glimpse into the future of artificial intelligence

Key Features

- 1 Extensive Theoretical Content The book covers the full spectrum of topics from fundamental concepts to advanced techniques Each chapter is designed to build on the previous one ensuring a logical progression and deep comprehension of the subject matter
- 2 Online Test Papers To reinforce your learning we provide a series of online test papers that mimic real world scenarios and challenges These tests are designed to evaluate your understanding and help you identify areas that need further study
- 3 Video Tutorials Understanding concepts can sometimes be challenging through text alone Our book includes links to a series of video tutorials that provide visual and auditory explanations of complex topics These videos are created by experts and are intended to complement the written material offering a more immersive learning experience
- 4 Practical Applications Each chapter includes real world examples and case studies that illustrate how application is applied across different industries
- 5 Self Assessment Tools At the end of each chapter self assessment questions and exercises allow you to test your understanding and track your progress These tools are invaluable in helping you gauge your readiness and build confidence as you move forward

Whether you are an aspiring data scientist a business professional exploring AI application or an academic researcher pushing the boundaries of knowledge Artificial Intelligence Tools is crafted to be a valuable companion on your journey As you embark on this exploration of artificial intelligence we encourage you to engage with the content experiment with the tools and contribute to the ongoing dialogue surrounding the responsible development and application of intelligent systems The future of AI is in

your hands and we are excited to be part of your learning journey

Civil Liability for Artificial Intelligence and Software Mark A. Geistfeld, Ernst Karner, Bernhard A. Koch, Christiane Wendehorst, 2022-11-21 Initiated by the European Commission the first study published in this volume analyses the largely unresolved question as to how damage caused by artificial intelligence AI systems is allocated by the rules of tortious liability currently in force in the Member States of the European Union and in the United States to examine whether and if so to what extent national tort law regimes differ in that respect and to identify possible gaps in the protection of injured parties The second study offers guiding principles for safety and liability with regard to software testing how the existing *acquis* needs to be adjusted in order to adequately cope with the risks posed by software and AI The annex contains the final report of the New Technologies Formation of the Expert Group on Liability and New Technologies assessing the extent to which existing liability schemes are adapted to the emerging market realities following the development of new digital technologies

Data Mining and Exploration Chong Ho Alex Yu, 2022-10-27 This book introduces both conceptual and procedural aspects of cutting edge data science methods such as dynamic data visualization artificial neural networks ensemble methods and text mining There are at least two unique elements that can set the book apart from its rivals First most students in social sciences engineering and business took at least one class in introductory statistics before learning data science However usually these courses do not discuss the similarities and differences between traditional statistics and modern data science as a result learners are disoriented by this seemingly drastic paradigm shift In reaction some traditionalists reject data science altogether while some beginning data analysts employ data mining tools as a black box without a comprehensive view of the foundational differences between traditional and modern methods e g dichotomous thinking vs pattern recognition confirmation vs exploration single method vs triangulation single sample vs cross validation etc This book delineates the transition between classical methods and data science e g from p value to Log Worth from resampling to ensemble methods from content analysis to text mining etc Second this book aims to widen the learner's horizon by covering a plethora of software tools When a technician has a hammer every problem seems to be a nail By the same token many textbooks focus on a single software package only and consequently the learner tends to fit the problem with the tool but not the other way around To rectify the situation a competent analyst should be equipped with a tool set rather than a single tool For example when the analyst works with crucial data in a highly regulated industry such as pharmaceutical and banking commercial software modules e g SAS are indispensable For a mid size and small company open source packages such as Python would come in handy If the research goal is to create an executive summary quickly the logical choice is rapid model comparison If the analyst would like to explore the data by asking what if questions then dynamic graphing in JMP Pro is a better option This book uses concrete examples to explain the pros and cons of various software applications

Open Semantic Technologies for Intelligent System Vladimir Golenkov, Victor Krasnoproshin, Vladimir Golovko, Elias Azarov, 2020-10-24 This book constitutes the refereed proceedings of

the 10th International Conference on Open Semantic Technologies for Intelligent System OSTIS 2020 held in Minsk Belarus in February 2020 The 14 revised full papers and 2 short papers were carefully reviewed and selected from 62 submissions The papers mainly focus on standardization of intelligent systems and cover wide research fields including knowledge representation and reasoning semantic networks natural language processing temporal reasoning probabilistic reasoning multi agent systems intelligent agents

c't Working with AI c't-Redaktion,2024-01-24 The special issue of c t KI Praxis provides tests and practical instructions for working with chatbots It explains why language models make mistakes and how they can be minimised This not only helps when you send questions and orders to one of the chatbots offered online If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI The c t editorial team explains where to find a suitable voice model how to host it locally and which service providers can host it The fact that generative AI is becoming increasingly productive harbours both opportunities and risks Suitable rules for the use of AI in schools training and at work help to exploit opportunities and minimise risks Law, Death, and Robots Keri Grieman,2024-10-17 Can the law keep up with AI This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future While AI moves quickly regulation follows more slowly an increasing problem for an evolutionary fast paced emerging technology AI has the potential to save lives but in doing so will have the potential to take them as well How do we future proof law and regulation to incentivise life saving innovation as safely as possible This book details how to regulate AI in high risk civil applications for example automated vehicles and medicine addressing both liability and regulatory structure It highlights crucial liability themes for technology governance provides tools to bridge the gap between regulators and technologists examines jurisdictional approaches to AI regulation in the EU UK USA and Singapore and ultimately suggests a jurisdiction agnostic blueprint for regulation Re-imagining Diffusion and Adoption of Information Technology and Systems: A Continuing Conversation Sujeet K. Sharma,Yogesh K. Dwivedi,Bhimaraya Metri,Nripendra P. The Very Long Game Heiko

Borchert, Torben Schütz, Joseph Verbovszky, 2024-07-18 This open access book is the outcome of a unique multinational effort organized by the Hamburg based Defense AI Observatory DAIO to portray the current state of affairs regarding the use of artificial intelligence AI by armed forces around the world The contributions span a diverse range of geostrategic contexts by providing in depth case studies on Australia Canada China Denmark Estonia Finland France Germany Greece India Iran Israel Italy Japan the Netherlands Russia Singapore South Korea Spain Sweden Taiwan Turkey Ukraine the UK and the United States The book does not speculate about the future implications of AI on armed forces but rather discusses how armed forces are currently exploring the potential of this emerging technology By adopting a uniform analytical framework each case study discusses how armed forces view defense AI how they are developing AI enhanced solutions adapting existing structures and processes and funding their defense AI endeavors to what extent defense AI is already fielded and operated and how soldiers and officers are being trained to work with AI

Human-centered AI Ben Shneiderman, 2022 The remarkable progress in algorithms for machine and deep learning have opened the doors to new opportunities and some dark possibilities However a bright future awaits those who build on their working methods by including HCAI strategies of design and testing As many technology companies and thought leaders have argued the goal is not to replace people but to empower them by making design choices that give humans control over technology In Human Centered AI Professor Ben Shneiderman offers an optimistic realist's guide to how artificial intelligence can be used to augment and enhance humans lives This project bridges the gap between ethical considerations and practical realities to offer a road map for successful reliable systems Digital cameras communications services and navigation apps are just the beginning Shneiderman shows how future applications will support health and wellness improve education accelerate business and connect people in reliable safe and trustworthy ways that respect human values rights justice and dignity

The State of Open Data Davies, Tim, Walker, Stephen B., Rubinstein, Mor, 2019-05-22 It's been ten years since open data first broke onto the global stage Over the past decade thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges Meanwhile issues related to data rights and privacy have moved to the centre of public and political discourse As the open data movement enters a new phase in its evolution shifting to target real world problems and embed open data thinking into other existing or emerging communities of practice big questions still remain How will open data initiatives respond to new concerns about privacy inclusion and artificial intelligence And what can we learn from the last decade in order to deliver impact where it is most needed The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world uncovering the issues that will shape the future of open data in the years to come

Proceedings of the 3rd International Conference on Computer Science's Complex Systems and Their Applications Toufik Marir, Maroua Bouzid, Rohallah Benaboud, Abdelhabib Bourouis, 2025-07-11 This book features a diverse collection of high quality papers

covering the latest advancements in Artificial Intelligence and its Applications Cybersecurity Software Engineering Emergent Technologies Networks and Embedded Systems The ICCSA 2024 Proceedings bring together the latest research presented at the International Conference on Computer Science s Complex Systems and Their Applications ICCSA 2024 held on November 13 14 2024 in Oum El Bouaghi Algeria Edited by leading experts in the field this publication showcases innovative methodologies theoretical breakthroughs and real world applications that shape the future of complex systems With contributions from renowned researchers from around the world who carefully selected the best research contributions for this international conference the ICCSA 2024 Proceedings stand as a valuable resource for academics industry professionals and students seeking insights into the evolving landscape of complex systems Whether you are interested in complex systems and their engineering or their interdisciplinary applications this book provides comprehensive and in depth coverage of the most pressing challenges and transformative innovations in this field *Artificial Intelligence in Education Technologies:*

New Development and Innovative Practices Tim Schlippe, Eric C. K. Cheng, Tianchong Wang, 2023-11-08 This book is a collection of selected research papers presented at the 2023 4th International Conference on Artificial Intelligence in Education Technology AIET 2023 held in Berlin Germany on June 30 July 2 2023 AIET establishes a platform for AI in education researchers to present research exchange innovative ideas propose new models as well as demonstrate advanced methodologies and novel systems It is a timely and up to date publication responsive to the rapid development of AI technologies practices and their increasingly complex interplay with the education domain It promotes the cross fertilisation of knowledge and ideas from researchers in various fields to construct the interdisciplinary research area of AI in Education These subject areas include computer science cognitive science education learning sciences educational technology psychology philosophy sociology anthropology and linguistics The feature of this book will contribute from diverse perspectives to form a dynamic picture of AI in Education It also includes various domain specific areas for which AI and other education technology systems have been designed or used in an attempt to address challenges and transform educational practice This timely publication is in line with UNESCO s Beijing Consensus on Artificial Intelligence and Education It is committed to exploring how AI may play a role in bringing more innovative practices transforming education and triggering an exponential leap towards the achievement of the Education 2030 Agenda Providing broad coverage of recent technology driven advances and addressing a number of learning centric themes the book is an informative and useful resource for researchers practitioners education leaders and policy makers who are involved or interested in AI and education

AI Game Development Alex J. Champandard, 2003 With game players expecting greater intelligence efficiency and realism with non player characters AI plays an ever increasing important role in game development This is a tremendous challenge for game developers in methodology software design and programming Creating autonomous synthetic creatures that can adapt in games requires a different kind of understanding of AI than the classical approach used

by current game programmers The Nouvelle Game AI approach presented in this book focuses on creating embodied animats that behave in an intelligent and realistic manner In particular learning AI is generating much interest among the game development community as these modern techniques can be used to optimize the development process Book jacket

Robotics, AI, and Humanity Joachim von Braun, Margaret S. Archer, Gregory M. Reichberg, Marcelo Sánchez Sorondo, 2021-02-12 This open access book examines recent advances in how artificial intelligence AI and robotics have elicited widespread debate over their benefits and drawbacks for humanity The emergent technologies have for instance implications within medicine and health care employment transport manufacturing agriculture and armed conflict While there has been considerable attention devoted to robotics AI applications in each of these domains a fuller picture of their connections and the possible consequences for our shared humanity seems needed This volume covers multidisciplinary research examines current research frontiers in AI robotics and likely impacts on societal well being human robot relationships as well as the opportunities and risks for sustainable development and peace The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI robotics technologies are elaborated [Elgar Companion to Regulating AI and Big Data in Emerging Economies](#) Mark Findlay, Li Min Ong, Wenxi Zhang, 2023-12-11 Committed to highlighting the regulatory needs and priorities of emerging economies in the context of AI and big data this expertly crafted Companion explores the nature and role of regulation in the Global South from a techno dependent societal perspective It not only amplifies the unspoken and underrepresented voices in AI and data regulation scholarly discourse but also provides a novel approach to otherwise recipient economies in an age of digital transformation
