Best Practices for Human Resources Management in Tourism and Hospitality Borbon, Noelah Mae, 2025-09-10. Effective human resources management (HRM) is essential to the success and sustainability of the tourism and hospitality industry. As the industry faces evolving challenges such as seasonal employment and diverse workforce needs, implementing best practices in recruitment and training is essential. Emphasizing strategic HRM approaches not only enhances operational efficiency but also cultivates a resilient, motivated, and service-oriented workforce capable of adapting to the dynamic demands of global tourism and hospitality. *Best Practices for Human Resources Management in Tourism and Hospitality* discusses scholarly and practical insights into the most effective HR practices within the tourism and hospitality sectors. It provides a thorough understanding of how HR practices can be optimized to enhance employee satisfaction, operational efficiency, and overall organizational performance. Covering topics such as artificial intelligence, talent acquisition, and tourist experiences, this book is an excellent resource for academicians, researchers, industry professionals, policymakers, regulators, consultants, advisors, business leaders, and more.

Emerging Technologies in AI, Computation, Communication, and Cybersecurity Manoj Kumar, Tanweer Ali, Jaume Anguera, Suman Lata Tripathi, 2026-01-22. The First International Conference on Artificial Intelligence, Computation, Communication, and Network Security (AICCoNS 2025) will be hosted by the School of Computer Science, University of Wollongong, in Dubai, UOWD, UAE, on 5-6 June 2025, in hybrid mode, with the on-site venue at the UOWD campus. Under the theme "Innovative Convergence: Pioneering AI, Advanced Computation, Secure Networks, and Seamless Communication for a Smarter Future," AICCoNS 2025 aims to provide a multidisciplinary platform for researchers, academicians, industry professionals, and practitioners to engage in high-quality discussions on technological innovations and challenges. The conference will explore four major tracks: Artificial Intelligence, machine learning, deep learning, and intelligent systems; Computational Systems, high performance, distributed cloud, edge, fog, and quantum-inspired computing; Communication Frameworks, IoT, 5G, 6G, wireless networks, and software-defined networking; and Cybersecurity and Network Security, cryptography, intrusion detection, threat intelligence, and secure architectures. Highlights of the event include keynote addresses by internationally renowned experts, technical paper presentations showcasing original research, and networking opportunities to foster academia-industry collaboration. By bridging theoretical advancements with real-world applications, AICCoNS 2025 seeks to advance intelligent, secure, and sustainable computational ecosystems while promoting innovation that can shape the future of digital society.

Artificial Intelligence and Tortious Liability Nasir Muftić, 2025-03-14 This book examines whether current liability systems can handle cases involving artificial intelligence AI It questions whether general liability rules designed to be technology agnostic are adequate for AI related accidents While focusing on Bosnia and Herzegovina it addresses issues relevant across Europe offering answers based on common principles and tort law rules The book begins with an introduction to AI technology and associated civil law challenges regarding e.g. autonomy data importance and non transparency It then discusses the broader context of civil law issues the role of liability systems rule making levels and timing and ancillary mechanisms like insurance and safety standards The bases of liability in Bosnia and Herzegovina are examined including objective and subjective liability product liability and vicarious liability The allocation of liability is also addressed focusing on AI's autonomy and loss of user control and evaluating traditional liability allocation principles Finally the book analyzes why those harmed by AI might be worse off than those affected by conventional adverse events

Breaking Away Maurice E. Stucke, 2022 *Breaking Away* sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more

competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous Breaking Away not only articulates the limitations of the current enforcement and regulatory approach but offers concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information
