Make a page's content more relevant to a search query. This can include using keywords in the page title, URL, meta description, H1 text, and content.

Write a short, relevant summary of the page's content that interests and informs users. This is one of the first things people see when searching for something, so it's important to optimize it to convince users to click on the result.

Get other websites to link to your website to build a network of links and strengthen its authority in search engines.

Crawling is when Googlebot analyzes the content and code on a page, while indexing is when the page is stored, analyzed, and organized so it can appear in search results.
