University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties **The Return**

of Inequality Mike Savage, 2021-05-18 Sociologist Mike Savage shows how economic inequality aggravates cultural social and political conflicts challenging the framework of liberal democracy By fracturing social bonds inequality turns back the clock reviving conditions we have struggled for centuries to escape including empire dynastic elitism and explosive ethnic division *Breaking Ranks* Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That

can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality **The American Presidents Ranked by Performance, 1789-2012, 2d ed.** Charles F.

Faber, Richard B. Faber, 2014-01-10 This is a revision and an updating of the first edition published in 2000 Presidents from Washington to Obama not included are William Henry Harrison and James A Garfield because of very short terms are rated in five categories Foreign Relations Domestic Programs Administration and Intergovernmental Relations Leadership and Decision Making and Presidential Comportment Each president is evaluated on his effectiveness in each area and a final analysis is provided for the scores combined The presidents are then ranked overall The most overrated and underrated chief executives are identified Each entry includes biographical and political information as well as an analysis of their overall behavior and status Special bulletin of the Bureau of Business Research, College of Commerce and Administration, the Ohio State University , 1928 *Academic Capitalism* Richard Münch, 2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution *University Rankings, Diversity, and the New Landscape of Higher Education* , 2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology

they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people *Investing in College* Malcolm GETZ, 2009-06-30 College education is one of the most important investments a family will make But between the viewbooks websites insider gossip and magazine rankings students and their worried parents face a dizzying array of options What do the rankings really mean Is it wise to choose the most prestigious school a student can get into What are the payoffs of higher education and by the way how do we pay for them In a unique approach to these conundrums an economist and award winning teacher walks readers through the opportunities risks and rewards of heading off to college Warning against the pitfalls of numerical rankings Malcolm Getz poses questions to guide a student toward not necessarily the best college but the right one Famous professors suggest quality but do they teach undergraduates Are smaller classes always better When is a state university the best deal around In a concise overview of decades of research Getz reviews findings on the long term returns of college education in different careers from law to engineering from nursing to financial management Sorting through personal professional and institutional variables he helps families determine when paying 40 000 a year might make sense and when it merely buys an expensive rear window decal He breaks down the formidable admissions game into strategies to improve the odds of acceptance and he offers tips on tax breaks subsidized loans federal grants 529 accounts merit scholarships and much more
