The volume discusses in detail the valuation approaches such as the discounted cash flows, remembering that cash is king, or the empirical market multipliers and comparables. The approaches are complemented by several models including advanced business planning that incorporates machine learning, digital scalability, networks, or validating blockchains. The book, with a tailor-made theoretical background backed by empirical cases, shows how to evaluate AI products such as chatbots or virtual assistants for AI established producers, startups, or traditional brick-and-mortar AI users.
