Lucas Jr., 2012-06-06 Ideal for business students business managers and corporate senior executives this book distills the lessons learned from the disasters that have befallen companies that were unable to cope with disruptive technologies In recent decades technology has changed rapidly to the point that it can very quickly affect a seemingly impregnable company or industry Unexpected technological developments enable innovators to offer new products and services that threaten incumbents In order to survive existing firms must be able to see a disruption on the horizon and figure out how to respond The Search for Survival Lessons from Disruptive Technologies examines organizations that failed to develop a strategy for coping with a technological disruption and have suffered greatly or even gone out of business The first chapter presents a model of how firms can respond to and hopefully survive a disruptive technology Each following chapter focuses on firms that have failed to survive or whose future is in doubt accompanied by an extensive detailed discussion of the lessons learned from each company or field s failings covering examples from industries such as recorded music book publishing video newspaper and higher education *Sentient Strategy* Alan Weiss, 2023-03-23 No pre pandemic strategy is effective anymore None Not for organizations large or small for profit or non profit domestic or global Claims of a

return to normal or the new normal are ridiculous What we are facing is really a new reality and that reality is the need for agile strategic decisions and pragmatic views of the future That means that strategy formulation can be reduced to a few days and the view of the future can only be 12-18 months This is the antithesis of Peter Drucker's approach to strategy but his highly effective approach was developed at GM three quarters of a century ago It's time to move on Alan Weiss has developed an original and completely new approach to strategy which thus far has certified over 100 people globally delivering this approach to scores of firms of all types in four countries More than two dozen firms are using this approach Sentient Strategy is based on two modern dimensions awareness of the environment in which the organization exists and has influence and consciousness of the impact of actions being considered The old SWOT strengths weaknesses opportunities threats approaches are currently equivalent to riding down the freeway on a horse We must drop the hubris that has led us to believe we can see years ahead and anticipate what's coming No one predicted the Internet No one predicted the latest pandemic It's time to turn volatility and disruption on their heads and use them as offensive weapons in the marketplace instead of trying to protect ourselves from them Imagine a strategy that an organization can formulate in just a day or so revisit easily and frequently and design a series of shorter term viable futures Sentient means perceptive and self-aware It doesn't mean one size fits all from a cookie cutter firm's approach to strategy Alan Weiss equips the reader to consider using this approach independently These are new times a new reality a no normal™ hence it's ridiculous to use old approaches to strategy There's a clear reason why Sears didn't morph into Amazon and why Hertz surrendered its number one spot to Enterprise
