This publication highlights the fast moving technological advancement and infiltration of Artificial Intelligence into society. Concepts of evolution of society through interconnectivity are explored together with how the fusion of human and technological interaction leading to Augmented Humanity is fast becoming more than just an endemic phase but a cultural phase shift to digital societies. It aims to balance both the positive progressive outlooks such developments bring with potential issues that may stem from innovation of this kind such as the invasive procedures of bio hacking or ethical connotations concerning the usage of digital twins. This publication will also give the reader a good level of understanding on fundamental cyber defence principles interactions with Critical National Infrastructure (CNI) and the Command Control Communications and Intelligence (C3I) decision making framework. A detailed view of the cyber attack landscape will be garnered touching on the tactics techniques and procedures used red and blue teaming initiatives cyber resilience and the protection of larger scale systems. The integration of AI smart societies the human centric approach and Augmented Humanity is discernible in the exponential growth collection and use of big data concepts woven throughout the diversity of topics covered in this publication which also discusses the privacy and transparency of data ownership and the potential dangers of exploitation through social media. As humans are becoming ever more interconnected with the prolificacy of smart wearable devices and wearable body area networks the availability of and abundance of user data and metadata derived from individuals has grown exponentially. The notion of data ownership privacy and situational awareness are now at the forefront in this new age.

Power to the Players Rob Smat, 2023-11-21

The sea shanties YOLO s and red bandanas aren't even half of the GameStop story. Did you know Robinhood didn't initiate their infamous trading halt? Did you know why Redditors refer to 2021 as the sneeze rather than the squeeze? Did you know that shares in your brokerage account might be counterfeits? If not buckle up. Witness firsthand the real and utterly ludicrous hivemind that brought Wall Street to its knees in January 2021 and find out why GameStop was only the beginning of an even more unprecedented retail contagion one which will challenge everything you think you know about our markets all over again. If the meme mania of 2021 drew blood from Wall Street what follows is the Shakespearean realization that Reddit's blade was in fact poisoned. In a digital world of frequently deleted revised and buried information accurately piecing together events as they occurred is nearly impossible. Other authors and journalists have understandably struggled but not author Rob Smat who has been a witness to every part of the GameStop phenomenon having lived it himself. Power to the Players is as much an unabridged history of the GameStop sneeze as it is a roadmap of how retail traders regrouped in the months and years that followed when everyone else thought the story had ended in calamity. The truest of diamond hands never sold and their power has only grown stronger since. Before Redditors were only a nuisance to the status quo. Now they

Designing for Democracy Jennifer Forestal, 2022

How should we fix

digital technologies to support democracy instead of undermining it In *Designing for Democracy* Jennifer Forestal argues that accurately evaluating the democratic potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory *Designing for Democracy* provides blueprints for democracy in a digital age **Business and Society** Cynthia E. Clark, Kabrina K.
