Science Experiments Tips:

The Really Useful Book of Science Experiments Tracy-ann Aston, 2015-09-16 The Really Useful Book of Science Experiments contains 100 simple to do science experiments that can be confidently carried out by any teacher in a primary school classroom with minimal or no specialist equipment needed. The experiments in this book are broken down into easily manageable sections including It's alive experiments that explore our living world including the human body, plants, ecology and disease. A material world experiments that explore the materials that make up our world and their properties including metals, acids and alkalis, water and elements. Let's get physical experiments that explore physics concepts and their applications in our world including electricity, space, engineering and construction. Something a bit different experiments that explore interesting and unusual science areas including forensic science, marine biology and volcanology. Each experiment is accompanied by a subject knowledge guide filling you in on the key science concepts behind the experiment. There are also suggestions for how to adapt each experiment to increase or decrease the challenge. The text does not assume a scientific background, making it incredibly accessible and links to the new National Curriculum programme of study allow easy connections to be made to relevant learning goals. This book is an essential text for any primary school teacher, training teacher or classroom assistant looking to bring the exciting world of science alive in the classroom. *101 Great Science Experiments* Neil Ardley, 2015-01-16 Forget about mad scientists and messy laboratories. This incredible interactive guide for children showcases 101 absolutely awesome experiments you can do at home. Find out how to make a rainbow, build a buzzer, see sound, construct a circuit, bend light, play with shadows, measure the wind, weigh air and create an underwater volcano. The astonishing variety of experiments are all very easy and entirely safe with step by step text and everyday ingredients. Biology, chemistry and physics are brought to life showing budding young scientists that science is all around us all the time. As you have fun trying out experiments with friends and family, core scientific principles are presented in the most memorable way. With chapters covering important topics such as color, magnets, light, senses, electricity and motion, the laws of science are introduced in crystal clear text alongside specially commissioned full color photography for children to understand.
