Flexible Network Support with Mobile IP and Its Application to Mobile Instant Communication Xinhua Zhao, 2001 Next-Generation FTTH Passive Optical Networks Josep Prat, 2008-07-16 Fibre to the Home networks constitute a fundamental telecom segment with the required potential to match the huge capacity of transport networks with

the new user communication demands Huge investments in access network infrastructure are expected for the next decade with many initiatives already launched around the globe recently driven by the new broadband service demands and the necessity by operators to deploy a future proof infrastructure in the field Dense FTTH Passive Optical Networks PONs is a cost efficient way to build fibre access and international standards G E PON have been already launched leading to new set of telecom products for mass deployment However these systems only make use of less than 1% of the optical bandwidth thus relevant research is taking place to maximize the capacity of these systems with the latest opto electronic technologies demonstrating that the huge bandwidth available through the fibre access can be exploited in a cost efficient and reliable manner Next Generation FTTH Passive Optical Networks gathers and analyzes the most relevant techniques developed recently on technologies for the next generation FTTH networks trying to answer the question what s after G E PONs

Guide to Wireless Ad Hoc Networks Sudip Misra,Isaac Woungang,Subhas Chandra Misra,2009-03-02 Overview and Goals Wireless communication technologies are undergoing rapid advancements The past few years have experienced a steep growth in research in the area of wireless ad hoc networks The attractiveness of ad hoc networks in general is attributed to their characteristics features such as ability for infrastructure less setup minimal or no reliance on network planning and the ability of the nodes to self organize and self configure without the involvement of a centralized n work manager router access point or a switch These features help to set up a network fast in situations where there is no existing network setup or in times when setting up a fixed infrastructure network is considered infeasible for example in times of emergency or during relief operations Even though ad hoc networks have emerged to be attractive and they hold great promises for our future there are several challenges that need to be addressed Some of the well known challenges are attributed to issues relating to scalability quality of service energy efficiency and security
