Class and Everyday Life Kirsteen Paton, 2023-11-28 Exploring the issues of class through in depth studies of housing sport art music and politics in Britain Class and Everyday Life persuasively demonstrates the pervasive influence of class on everyday life and the need to centre a radical understanding of class within emancipatory political movements The need for a more expansive understanding of class is politically urgent There is a disconnect between descriptive and analytical approaches to class and the politics of class and realities around how class is lived Discourse has been shaped by top down frameworks of analysis and measurements which have stripped the study of class of its political radicalism This book makes the case for a sociology of class which is informed by a politics of class based upon using the everyday as the point of enquiry It presents a sociology of class from the bottom up which focuses on everyday life and the point at which class is made and remade In doing so it advocates for an attentiveness to class and everyday life through a conjunctural analysis Using an everyday lens this book examines how the shifting conjunctures manifest in everyday spaces in classed ways and how such changes are negotiated resisted and shape the working class subject and communities This is based upon an understanding of everyday classed experiences which identifies and challenges inequalities while also recognising value and hope This perspective aims to offer a recognition of both the opportunities and challenges of class as a way of developing a stronger more politicised understanding of class which takes solidarity and class community power seriously to resist inequality and develop emancipatory politics This urgent and impassioned book will be essential reading for students academics and activists with an interest in the lived experience of class in Britain today

**Drinking from the Fire Hose** Christopher J Frank, Paul Magnone, 2011-09-01 You re sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the presentation Just about everyone these days suffers from information overload the 24 7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It s like trying to drink from a fire hose The question isn t how to stop all those e mails meetings conference calls and fat reports that s impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask the right questions at the right time Whatever field you re in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe s Starbucks Kodak Microsoft iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of

information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe's best scientists generated oceans of data and carefully modeled the cloud's dispersion pattern But no one could answer the essential question Was the concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you'll start having more productive brainstorming sessions You'll answer critical questions faster and find unexpected solutions to important problems And you'll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with
