Business is great right up until the day Arden whites out losing fifteen minutes of her life and all her memories of the boy across the schoolyard. The boy, her friends assure her, she's had a crush on for years. Arden realizes that her own memories have been hacked, but they haven't just been stolen and shared; they've been removed. And she's not the only one: her mysterious crush, Sebastian, has lost ALL of his memories. But how can they find someone who has the power to make them forget everything they've learned? With *Windows Into the Classroom*, personal accounts, and *The Game in Action*, vignettes, students are provided with practical applications throughout the book. Many contributors to this book were involved in the development and draft review of the National Science Education Standards and therefore fully appreciate the importance of overtly linking research-based commentary and recommendations to the Standards. As a result, the entire work is steeped in a current research foundation tied closely to the National Science Education Standards.
