Hello, we're the Map Men, and in the following pages, we've selected what we believe to be some of the very best wrong maps. Some of them are decades old, some are centuries old, and some are so recent they're still being published today or yesterday if you're reading this tomorrow. In *This Way Up*, we delve into laugh-out-loud funny, hilarious geographical gaffes including world maps.

that forego entire countries colonial maps with mathematically impossible borders and made up mountain ranges maps of US states with fake cities painfully incorrect maps on live news channels and more Whether you re an avid map junkie or simply map curious each chapter uncovers a unique tale of adventure error and unexpected humor as we attempt to answer the question What on earth happened here So ditch the compass or open settings and tap disable location services and set out on a journey with us the Map Men into a world of cartographic chaos and mappy mishaps Because the worst maps are the best maps

Street Sensing Fang-Ying

Gong,2025-06-30 Combining publicly available Google Street View GSV images with deep learning and radiative transfer models enables researchers to assess urban physical and thermal environments especially in high density areas This book

introduces this advanced approach which provides large scale high accuracy and high density measurements of street level urban features key to understanding urban radiation balance and thermal dynamics By leveraging GSV images this method directly characterizes urban streetscapes including structural and geometric attributes allowing for a comprehensive assessment Moreover the methods can be applied to any geographical location covered by GSV making it a low cost and effective tool for urban studies globally This is particularly advantageous compared to traditional 3D GIS models which may not always be freely available or as extensive in coverage as GSV images Lessons from Street Sensing provide data driven insights for urban planning and governance The accurate mapping of street view factors and solar irradiance helps identify areas with insufficient greenery excessive or insufficient solar exposure and other urban environment issues These insights can help policymakers and urban planners mitigate negative environmental impacts and improve urban living conditions

Mobile Mapping Clancy Wilmott, 2025-10-01 This book argues for a theory of mobile mapping a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power Drawing from literature in media studies and geography and the work of Michel Foucault and Doreen Massey it examines how geographical and historical material social and cultural conditions are embedded in the way in which contemporary digital cartographies are read deployed and engaged This is explored through seventeen walking interviews in Hong Kong and Sydney as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media In doing so Mobile Mapping offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched

Breaking Away Maurice E. Stucke, 2022 *Breaking Away* sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous *Breaking Away* not only articulates the limitations of the current enforcement and regulatory approach but offers

concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information **TRAVEL**

Visualizing Film History Christian Gosvig Olesen, 2025-01-07 Though many archival digital objects were not born digital film archives are now becoming important resources for digital scholarship as a consequence of digitization Moreover with advancements in digital research methods involving video annotation visual analysis and GIS affecting the way we look at archival films material stylistic histories and circulation new research practices are more important than ever Visualizing Film History is an accessible introduction to archive based digital scholarship in film and media studies and beyond With a combined focus on the history of film historiography archiving and recent digital scholarship covering a period from the first wave of film archiving in the early 1900s to recent data art this book proposes ways to work critically with digitized archives and research methods Christian Olesen encourages a shift towards new critical practices in the field with an in depth assessment of and critical approach to doing film historiography with the latest digital tools and digitized archives Olesen argues that if students scholars and archivists are to fully realize the potential of emerging digital tools and methodologies

they must critically consider the roles that data analysis visualization interfaces and procedural human machinery interactions play in producing knowledge in current film historical research. If we fail to do so we risk losing our ability to critically navigate and renew contemporary research practices and evaluate the results of digital scholarship.
