With carefully crafted features and vivid examples, Goolsbee, Levitt, and Syverson's text helps answer two critical questions students ask: Do people and firms really act as theory suggests? and How can someone use microeconomics in a practical way? The Drinking Game Guyon Espiner, 2023-02-28 An incisive analysis of how our drinking culture is influenced by the government, media, and big business by investigative journalist Guyon Espiner. This is real; it is raw, and it lays out the truth about booze. Patrick Gower thought provoking but never preachy. Espiner blends personal experience with his formidable journalism talents as he dissects the role of booze in our lives. Jack Tame: Of all the books that will be published in New Zealand in 2023, it's hard to imagine there will be many more important than this one. It's a gem, thought provoking, startling, persuasive, and entertaining, exploring how the way we drink has been shaped by factors far beyond any individual's control. Michael Burgess, ketebooks.co.nz Ever wondered why it always seems like a good time for a drink? Four years ago, investigative journalist Guyon Espiner gave up drinking alcohol. He had been a heavy yet controlled drinker since his teens, abstaining three nights a week but making up for it the other four. One morning he woke up after a big

night and decided he'd had enough and he quit no AA no support groups Not drinking has given Guyon a new perspective on our relationship with alcohol in Aotearoa and a lot of it is disturbing The Drinking Game investigates the alcohol industry the power politics and lobbying behind our most harmful drug Weaving together personal experience hard research and interviews it examines why New Zealand has such a heavy drinking culture the harm it causes and how our attitudes to alcohol are changing This is a sobering look into how the way you drink is shaped not only by your individual choice but also by government media and big business **Smart** Frederic Martel, 2018-07-05 Digitization is accelerating globalization tenfold Social networks have gone mobile telephone television and towns have gone smart How did China manage to create clones of Google Facebook and YouTube and build its own censored version of the Internet How do Arab countries use social networks for their revolutions Why is there no minister for communications in the US and why does no one regulate the Internet there From Silicon Valley to Tokyo from South Africa to southern India and all the way to Cuba and Gaza this unprecedented investigation in the field covers the whole battle of the Internet and its future Drawing on hundreds of interviews in about fifty countries Frederic Martel examines the different Internets on five continents In so doing he reveals that we are moving not only into a connected globalized world but also a territorialized one Smart shows that the Internet has never been truly global and that it will become increasingly local *Loose-leaf Version for Quantitative Literacy* Bruce Crauder, Benny Evans, Jerry Johnson, Alan Noell, 2014-12-26 I finally understand why I need to learn some math says a student after finishing a course that used Quantitative Literacy That enthusiastic response gets to the heart of how this remarkable textbook works Quantitative Literacy shows students that they use math in their everyday lives more than they realize and that learning math in real world contexts not only makes it easier to get better grades but prepares them for decisions they'll face about money voting and politics health issues and much more The authors draw on a wide range of examples to give students basic mathematical tools from sports to personal finance to sociopolitical action to medical tests to the arts with coverage that neatly balances discussions of ideas with computational practice
