Reddit Pro Ideas:

Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit one of the most popular and least studied social platforms of the early 21st century The book inspires new ways of thinking about Reddit considering it from multiple perspectives through a historical lens as a site where identity is forged as a democracy as a community and as a news aggregator and distributor By bringing theories from computer mediated communication communication studies and sociology to bear on original large scale observational analyses of Reddit s communities this book provides a uniquely comprehensive overview of the platform s first 15 years Understanding Reddit will help us make sense of how rapidly growing communities function in an era of mass online anonymity Serving both as a primer on how social behavior on Reddit plays out and as a way of locating it within multiple theoretical traditions the book will offer important insights to scholars and students in the disciplines of communication media studies information science internet and emerging media studies and sociology

The Idea of a Moral Economy Lawrin Armstrong, 2016-04-11 The Idea of a Moral Economy is the first modern edition and English translation of three questions disputed at the University of Paris in 1330 by the theologian Gerard of Siena The questions represent the most influential late medieval formulation of the natural law argument against usury and the illicit acquisition of property Together they offer a particularly clear example of scholastic ideas about the nature and purpose of economic activity and the medieval concept of a moral economy In his introduction editor Lawrin Armstrong discusses Gerard s arguments and considers their significance both within the context of scholastic philosophy and law and as a critique of contemporary mainstream economics His analysis demonstrates how Gerard s work is not only a valuable source for understanding economic thought in pre modern Europe but also a fertile resource for scholars of law economics and philosophy in medieval Europe and beyond

Teaching for Learning Claire Howell Major, Michael S. Harris, Todd D. Zakrajsek, 2015-08-27 Despite a growing body of research on teaching methods instructors lack a comprehensive resource that highlights and synthesizes proven approaches

Teaching for Learning fills that gap Each of the one hundred and one entries describes an approach and lists its essential features and elements demonstrates how that approach has been used in education including specific examples from different disciplines reviews findings from the research literature describes techniques to improve effectiveness Teaching for Learning provides instructors with a resource grounded in the academic knowledge base written in an easily accessible engaging and practical style

Understanding Movement Parties Through their Communication Dan Mercea,Lorenzo Mosca,2023-03-21 In many countries movement parties have swayed large tracts of the electorate Contributions to this edited book reflect on the place of movement parties in democratic politics through analyses of their communication Reviewing evidence from several countries including cases from Europe Australia and India where movement parties have gained ground in politics this book illuminates the important role that communication has played in their rise as well as the issues surrounding it Movement parties have expressed greater sensitivity to neglected issues a commitment to renewing links with marginalized social groups through more direct chiefly online communication with them as well as an ambition to overhaul both the party organization and the political system In doing so they have signalled a desire to disrupt and reimagine politics Yet the critical examination of their efforts and of the communication environment in which they operate against questions regarding the quality of democracy throws into relief a mismatch between a participation oriented rhetoric and concrete democratic practices Accordingly contributions draw attention to disconnections between a professed need for more immediate and greater participation in movement party organization and policymaking on the one hand their organizational practices and the communication of parties leaders and supporters on the other This book was originally published as a special issue of the journal Information Communication Society

Rise of the Far Right Melody Devries,Judith Bessant,Rob Watts,2021-07-29 After decades on the social and political margins far right groups and movements are enjoying increasing success and even claiming a place in mainstream electoral politics in many Western political systems Research shows that new media like Twitter YouTube and community sites likes 4chan and Reddit are increasingly involved with the mobilization of popular support for far right electoral campaigns and even organized political violence These technologies including other social media discussion websites certain online games chat servers talk radio cable news and print media are making contemporary far right ideologies possible in diverse ways altering methods of recruitment to the extent that they become unrecognizable from far right movements of the past and thus more dangerous The results of these new technological processes can be seen in the increasing normalization of far right values within mainstream culture politics and media ecosystems within countries from the United States Britain Australia Germany and Hungary This book brings together recent academic research exploring how far right groups use new media to recruit followers to extremist beliefs and mobilize political action In doing so the book reveals the complex ways that evolving technologies are used both purposively subtly and in some cases incidentally to recruit and mobilize far right support

The

History and Antiquities of the County Palatine of Durham William Hutchinson, 1785 ICT Innovations 2019.
