Building Multimodal Generative AI and Agentic Applications Indrajit Kar, 2025-10-27 DESCRIPTION Generative AI and agentic AI are reshaping how we interact with data enabling intelligent systems that can reason generate and autonomously act across multiple modalities From text and images to voice and structured data these technologies are increasingly essential in enterprise and research applications today This book offers a complete roadmap to mastering multimodal generative AI and agentic AI systems It covers foundational concepts vision language models retrieval augmented generation human in the loop and multi agent workflows text to SQL OCR and hybrid AI integrations Each chapter combines theory practical guidance code implementations and real world case studies helping readers understand architectures pipelines and production grade deployments By the end of this book readers will be capable of designing implementing and scaling robust multimodal and agentic AI systems They will gain hands on expertise in reasoning generation retrieval agent orchestration and Ops equipping them to build production ready AI applications and excel in their roles WHAT YOU WILL LEARN Understand multimodal generative AI and agentic AI systems Architecting RAG vector DBs embeddings cross encoders and core agentic planning Build retrieval augmented generation workflows efficiently Implement human in the loop and multi agent pipelines Apply text to SQL for real time data queries Develop OCR solutions for images and documents Integrate traditional ML models with GenAI workflows Deploy production grade AI with monitoring and observability WHO THIS BOOK IS FOR This book is for AI enthusiasts data scientists ML engineers and software developers with foundational Python and ML knowledge It is ideal for tech leads researchers and enterprise architects aiming to build and scale multimodal production grade agentic AI systems TABLE OF CONTENTS 1 Introducing New Age Generative AI 2 Deep Dive into Multimodal Systems 3 Implementing Unimodal Local GenAI System 4 Implementing Unimodal API based GenAI Systems 5 Implementing Agentic GenAI Systems with Human in the loop 6 Two and Multi stage GenAI Systems 7 Building a Bidirectional Multimodal Retrieval System 8 Building a Multimodal RAG System 9 Building GenAI Systems with Reranking 10 Retrieval Optimization for Multimodal GenAI 11 Building Multimodal GenAI Systems with Voice as Input 12 Advanced Multimodal GenAI Systems 13 Advanced Multimodal GenAI Systems Implementation 14 Building Text to SQL Systems 15 Agentic Text to SQL Systems and Architecture Decision Making 16 GenAI for Extracting Text from Images 17 Integrating Traditional AI ML into GenAI Workflow 18 LLM Operations and GenAI Evaluation Techniques **Introduction to**

Foundation Models Pin-Yu Chen, Sijia Liu, 2025-06-12 This book offers an extensive exploration of foundation models guiding readers through the essential concepts and advanced topics that define this rapidly evolving research area Designed for those seeking to deepen their understanding and contribute to the development of safer and more trustworthy AI technologies the book is divided into three parts providing the fundamentals advanced topics in foundation models and safety and trust in foundation models Part I introduces the core principles of foundation models and generative AI presents the

technical background of neural networks delves into the learning and generalization of transformers and finishes with the intricacies of transformers and in context learning Part II introduces automated visual prompting techniques prompting LLMs with privacy memory efficient fine tuning methods and shows how LLMs can be reprogrammed for time series machine learning tasks It explores how LLMs can be reused for speech tasks how synthetic datasets can be used to benchmark foundation models and elucidates machine unlearning for foundation models Part III provides a comprehensive evaluation of the trustworthiness of LLMs introduces jailbreak attacks and defenses for LLMs presents safety risks when fine tuning LLMs introduces watermarking techniques for LLMs presents robust detection of AI generated text elucidates backdoor risks in diffusion models and presents red teaming methods for diffusion models Mathematical notations are clearly defined and explained throughout making this book an invaluable resource for both newcomers and seasoned researchers in the field

Introduction to Information Systems R. Kelly Rainer, Brad Prince, 2025-11-04 As digital transformation becomes increasingly central to effective corporate strategy today's students must learn how information systems provide the foundation for modern business enterprises Known for its rich content and focus on active learning Introduction to Information Systems 11th Edition shows students how they can use IS to help their current or future employers increase profitability improve customer service manage daily operations and drive impact in their markets This course demonstrates that IT is the backbone of any business whether a student is majoring in accounting finance marketing human resources production operations management or MIS In short students will learn how information systems provide the foundation for all modern organizations whether they are public sector private sector for profit or not for profit Digital Libraries Across Continents Le Yang, Alicia Salaz, 2025-06-13 Digital Libraries Across Continents illustrates how digital librarianship practitioners and scholars digitize exhibit and preserve their cultural heritage and how these practices may be influenced by the policy economic and sociocultural environments in which they are developed Including scholarly articles case studies examples of best practice and conceptual essays solicited from different continents this book provides an overview of the status quo of digital libraries around the globe The case studies examine how macro level policy funding and social priorities influence the development of digital libraries The volume offers a deeper understanding of the similarities and differences between libraries in different countries and the ways in which they view foster develop and sustain digital librarianship Chapters within the book examine systems standards workflows content protocol social and policy environments culture metadata and more through a series of case studies provided by practitioners working in these settings Taking a comparative international approach the book promotes the development of inclusive accessible and sustainable digital libraries that serve a global human knowledge endeavor Digital Libraries Across Continents provides a wide ranging examination of issues in cross border digital library contexts It will be essential reading for library practitioners as well as information scientists and educators **Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology** Holger Andreas

Volk,Jasmin Nicole Nessler,Anna Zamansky,Sebastian Meller,Annika Bremhorst,2025-08-18 The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical clinical pathology and imaging information We are interested in original research systematic reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species AI to assess behavioural states in both clinical and natural environments AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine Potential of AI to enhance clinical practice in veterinary behavioural medicine veterinary neurology and animal behaviour research Potential of AI enhanced diagnostic and behavioural assessment tools with animals
