After Work Helen Hester,Nick Srnicek,2023-07-18 A timely manifesto for a feminist post work politics Does it ever feel like you have no free time You come home after work and instead of finding a space of rest and relaxation you re confronted by a pile of new tasks to complete cooking cleaning looking after the kids and so on In this ground breaking book Helen Hester and Nick Srnicek lay out how unpaid work in our homes has come to take up an ever increasing portion of our lives how the vacuum of free time has been taken up by vacuuming Examining the history of the home over the past century from running water to white goods to smart homes they show how repeated efforts to reduce the burden of this work have faced a variety of barriers challenges and reversals Charting the trajectory of our domestic spaces over the past century Hester and Srnicek consider new possibilities for the future uncovering the abandoned ideas of anti housework visionaries and sketching out a path towards real free time for all where everyone is at liberty to pursue their passions or do nothing at all It will require rethinking our living arrangements our expectations and our cities

Gerontechnologies for Home Support Alexander Moreno,Sumi Helal,Henk Herman Nap,Gloria M. Gutman,2024-10-07 In recent years various digital and non digital gerontechnology applications in home support have been developed From medication administration aids e g reminders and alarms to environmental monitoring e g air quality sensors and cameras to fall detection and health and activity monitoring e g smartwatch these promising solutions are in the works or already in the marketplace Additionally the COVID 19 pandemic has accelerated the development and deployment of technological solutions supporting remote care and communication e g video calls and home service delivery e g meals and groceries both of which have been developed to facilitate aging in place This is significant especially as avoiding the institutionalization of older adults has become a major goal of governments and caring families around the world These technologies are a potential solution to help older adults and family caregivers age at home maintain autonomy and independence and avoid social isolation These technologies can reduce the workload of professional caregivers It is crucial to update our knowledge on evidence based technologies for home support tested simultaneously in older adults and their family caregivers Healthcare professionals and families are often disadvantaged by a lack of information demonstrating their utility and cost effectiveness This article collection focuses on providing evidence based information about emerging and existing gerontechnologies which is essential to make an informed decision in recommending their use or deciding to purchase them

For older adults it will provide proofs upon which to make an informed decision to invest in a specific technology when needed For family caregivers it will improve their judgment when trying to choose purchase and adopt a technology aiming to solve a problem at home and have peace of mind when these technologies are used to support their loved ones For clinicians it will provide a pool of evidence based technological tools that could be recommended to families facing the loss of autonomy and independence of older adults For researchers and scholars it will provide a base of knowledge for future applied research in gerontechnology Finally improving the evidence in gerontechnology will help to provide cues for policymakers and governments to create legislation aiming to protect the public and the end users of these technologies
