This book traces the Utilities of AI, IoT and Blockchain in contemporary issues. It analyses how AI and IoT is primarily being driven by Reshaping Technological Perspectives as the only factor of Applications and its consequences for the global educational development. Artificial Intelligence, AI, IoT, Blockchain Technology refers to the development of computer systems or machines that can perform tasks that typically require human intelligence. This book presents both theoretical foundations of AI and an indication of the ways that current techniques can be used in application programs. With the revision, most of the content has been preserved as it is, and an effort has been put in on adding new topics that are in sync with the recent developments in this rehabilitation field. A tract for the times, this edition will be a major intervention in the rehabilitation sector that is heavily debated but rarely understood.
