Computer Books Communications Networking Web Designer's Idea Book, Volume 4 Patrick McNeil, 2014-10-17 Discover the latest trends in web design. Looking for inspiration for your latest web design project? Expert Patrick McNeil, author of the popular Web Designer's Idea Book series, is back with all new examples of today's best website design. Featuring more than 650 examples of the latest trends, this fourth volume of The Web Designer's Idea Book is overflowing with visual inspiration. Arranged categorically, this fully illustrated guide puts important topics like design styles, elements, themes and responsive design at your fingertips. This new volume also includes a detailed discussion of portfolios to

help you stay ahead of the pack and keep your portfolio fresh and relevant The world of web design is constantly reinventing itself Stay on top of what's hot with the latest installment of this indispensable reference Charming Decays of the Higgs, Z, and W Bosons Spandan Mondal, 2025-06-13 This book presents searches for the Higgs boson Z boson and W boson decaying into charm quarks performed with proton proton collision data at $\sqrt{s}=13\text{TeV}$ collected by the CMS experiment at the LHC CERN corresponding to an integrated luminosity of 138 fb^{-1} and recorded between 2016 and 2018 The searches are carried out using events in which the Higgs Z W boson is produced in association with a leptonically decaying Z or W boson This thesis also discusses a novel calibration algorithm for charm jet identification that enables maximal use of the available information related to charm jets The new method is used to correct the entire distribution expected as output when jet flavour identification algorithms are applied to jets of different flavours The calibrated results improve over traditional efficiency measurements and help enhance the sensitivities of the Higgs Z and W searches This book primarily reports on the so called resolved jet topology of the Higgs Z W boson searches where the boson candidates are reconstructed using two separate small radius AK4 jets Upon statistically combining the results of the resolved jet search with a complementary merged jet approach the observed expected upper limit on the Higgs decay to charm quarks corresponds to 14.76 times the Standard Model expectation at the 95% CL which is the most stringent direct limit to date A significance of 5.759 over the background only prediction is observed expected in case of the search for charmed Z boson decays Only the resolved jet topology is used in the search for charmed W decays and the observed expected significance is 5.657 over the background only prediction These mark the first observations of charmed decays of the Z and W bosons at a hadron collider experiment
