Pervasive Animation Pervasive Animation:

Pervasive Animation Suzanne Buchan, 2013-08-22 This new addition to the AFI Film Readers series brings together original scholarship on animation in contemporary moving image culture from classic experimental and independent shorts to digital animation and installation The collection that is also a philosophy of animation foregrounds new critical perspectives on animation connects them to historical and contemporary philosophical and theoretical contexts and production practice and expands the existing canon Throughout contributors offer an interdisciplinary roadmap of new directions in film and animation studies discussing animation in relationship to aesthetics ideology philosophy historiography visualization genealogies spectatorship representation technologies and material culture **Pervasive Animation**, 2007 Animation has an unlimited potential to visually represent events scenarios and forms that have little or no relation to our experience of the real world Implemented in many ways in many disciplines it is increasingly influencing our perception and experience of the world we live in This timely and groundbreaking international conference unites speakers from a wide range of research agendas and creative practices It facilitates much needed dialogue centred on the ubiquitous and interdisciplinary nature of animation its potentially radical future development and its ethical responsibilities for spatial politics in moving image culture <https://www.tate.org.uk/audio/pervasive-animation-audio-recordings> **Experimental and Expanded Animation** Vicky Smith, Nicky Hamlyn, 2018-08-21 This book discusses developments and continuities in experimental animation that since Robert Russett and Cecile Starr's *Experimental Animation: Origins of a New Art* 1976 has proliferated in the context of expanded cinema performance and live making and is today exhibited in galleries public sites and online With reference to historical critical phenomenological and interdisciplinary approaches international researchers offer new and diverse methodologies for thinking through these myriad animation practices This volume addresses fundamental questions of form such as drawing and the line but also broadens out to encompass topics such as the intermedial post humanism the real fakeness and fabrication causation new forms of synthetic space ecology critical reworkings of cartoons and process as narrative This book will appeal to cross and interdisciplinary researchers animation practitioners scholars teachers and students from Fine Art Film and Media Studies Philosophy and Aesthetics Animating Film Theory Karen Redrobe, 2014-03-21 *Animating Film Theory* provides an enriched understanding of the relationship between two of the most unwieldy and unstable organizing concepts in cinema and media studies animation and film theory For the most part animation has been excluded from the purview of film theory The contributors to this collection consider the reasons for this marginalization while also bringing attention to key historical contributions across a wide range of animation practices geographic and linguistic terrains and historical periods They delve deep into questions of how animation might best be understood as well as how it relates to concepts such as the still the moving image the frame animism and utopia The contributors take on the kinds of theoretical questions that have remained underexplored because as Karen Beckman argues

scholars of cinema and media studies have allowed themselves to be constrained by too narrow a sense of what cinema is. This collection reanimates and expands film studies by taking the concept of animation seriously. Contributors: Karen Beckman, Suzanne Buchan, Scott Bukatman, Alan Cholodenko, Yuriko Furuhashi, Alexander R. Galloway, Oliver Gaycken, Bishnupriya Ghosh, Tom Gunning, Andrew R. Johnston, Hervé Joubert, Laurencin Gertrud Koch, Thomas LaMarre, Christopher P. Lehman, Esther Leslie, John MacKay, Mihaela Mihailova, Marc Steinberg, Tess Takahashi.

Circus, Science and Technology Anna-Sophie Jürgens, 2020-06-22. This book explores the circus as a site in and through which science and technology are represented in popular culture. Across eight chapters written by leading scholars from fields as varied as performance and circus studies, art media and cultural history, and engineering, the book discusses to what extent the engineering of circus and performing bodies can be understood as a strategy to promote awe. How technological inventions have shaped circus and the cultures it helps constitute, and how much of a mutual shaping this is. What kind of cultural and aesthetic effects does engineering in circus contexts achieve? How do technological inventions and innovations impact on the circus? How does the link between circus and technology manifest in representations and interpretations, imaginaries of the circus in other media and popular culture? **Circus, Science and Technology** examines the ways circus can provide a versatile frame for interpreting our relationship with technology.

Controversial Images Feona Attwood, Vincent Campbell, I.Q. Hunter, Sharon Lockyer, 2015-12-26. Offering a series of case studies of recent media controversies, this collection draws on new perspectives in cultural studies to consider a wide variety of images. The book suggests how we might achieve a more subtle understanding of controversial images and negotiate the difficult terrain of the new media landscape.
