first comprehensive work to provide a structured framework for AI governance focuses specifically on the regulatory challenges of LLMs like ChatGPT. It presents an extensive framework for understanding AI regulation, addressing its societal and ethical impacts and exploring potential policy directions. Through 11 meticulously researched chapters, the book examines AI's historical development, industry applications, socio-ethical concerns, and legal challenges. Advocating for a human-centric, risk-based regulatory approach, emphasising transparency, public participation, and ongoing monitoring, the book covers such aspects of AI and its governance as the following: a comprehensive overview of the history and mechanics of AI; widespread public misconceptions surrounding ChatGPT; ethical considerations, e.g. misinformation, accountability, and transparency; societal implications, e.g. job displacement, critical thinking, and malicious use; privacy concerns; intellectual property challenges; healthcare application dilemmas; interplay between LLMs and finance; and cross-border regulatory challenges. Throughout, the author identifies significant gaps in existing legal frameworks and explores potential policy directions to bridge these gaps. The book offers invaluable insights and recommendations for policymakers, legal experts, academics, students, technologists, and anyone interested in AI governance. It underscores the need for a collaborative effort and meaningful dialogue among industry leaders, academia, and civil society worldwide to promote responsible and ethical development and use of AI for the benefit of humanity.

Learn Generative AI with PyTorch Mark Liu, 2025-01-28

Learn how generative AI works by building your very own models that can write coherent text, create realistic images, and even make lifelike music. *Learn Generative AI with PyTorch* teaches the underlying mechanics of generative AI by building working AI models from scratch. Throughout, you'll use the intuitive PyTorch framework that's instantly familiar to anyone who's worked with Python data tools. Along the way, you'll master the fundamentals of General Adversarial Networks (GANs), Transformers, Large Language Models (LLMs), variational autoencoders, diffusion models, LangChain, and more. In *Learn Generative AI with PyTorch*, you'll build these amazing models: A simple English to French translator; A text-generating model as powerful as GPT-2; A diffusion model that produces realistic flower images; Music generators using GANs and Transformers; An image style transfer model; A zero-shot know-it-all agent. The generative AI projects you create use the same underlying techniques and technologies as full-scale models like GPT-4 and Stable Diffusion. You don't need to be a machine learning expert; you can get started with just some basic Python programming skills. About the technology: Transformers, Generative Adversarial Networks (GANs), diffusion models, LLMs, and other powerful deep learning patterns have radically changed the way we manipulate text, images, and sound. Generative AI may seem like magic at first, but with a little Python, the PyTorch framework, and some practice, you can build interesting and useful models that will train and run on your laptop. This book shows you how. About the book: *Learn Generative AI with PyTorch* introduces the underlying mechanics of generative AI by helping you build your own working AI models. You'll begin by creating simple images using a GAN and then progress to writing a language translation transformer line by line. As you work through the fun and fascinating projects, you'll train models to create anime

images write like Hemingway make music like Mozart and more You just need Python and a few machine learning basics to get started You ll learn the rest as you go What s inside Build an English to French translator Create a text generation LLM Train a diffusion model to produce high resolution images Music generators using GANs and Transformers About the reader Examples use simple Python No deep learning experience required About the author Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky The technical editor on this book was Emmanuel Maggiori
