Smith, 1979 Guide to

Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants. The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions, with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes.

Outdoor Education, 1971 *Contemporary Plant Systematics* Dennis W. Woodland, 2000 It has been written to teach basic botanical facts as applied to vascular plants, relates these facts to systematic principles, shows how systematic principles are important to contemporary botanical and environmental issues from a global perspective and allows the student access to computer botanical images. Andrews University Press.
