Routledge German Dictionary of Business, Commerce and Finance Worterbuch Fur Wirtschaft, Handel und Finanzen Sinda Lopez, 2019-07-12 First published in 2002 The German Dictionary of Business Commerce and Finance is the second dictionary to be published in Routledge's programme of bilingual business dictionaries The series was launched in December 1995 with the French Dictionary of Business Commerce and Finance It would not have been possible to compile this dictionary within a relatively short timescale and to the standard achieved without the use of a highly sophisticated custom designed database The database's most significant feature is that it is designed as a relational database term records for each language are held in separate files with further files consisting only of link records Links between terms in different language files represent translations enabling us to handle various types of one to many and many to one equivalences Links between terms within a single language file represent crossreferences between geographical variants and abbreviations The content of the database for this dictionary was created in three principal phases A considerable proportion of the English term list was already available following the publication of the French Dictionary of Business Commerce and Finance The term list was then sent out to specialist translators with current practical experience of business translation who supplied German equivalences and expanded the English and German term lists to include the main relevant terminology in their particular spheres of work

Routledge German Dictionary of Business, Commerce, and Finance Routledge (Firm), 1997 This dictionary consists of some 50 000 terms and references and 4 000 abbreviations in both German and English Over 40 subject areas are covered including Accountancy Banking Computing Economics Finance General Commerce Human Resource Management Import Export Industry Insurance Law Management Mathematics Media Patents Politics Property Sales Marketing Stock Market Taxation Tourism Welfare Safety and many more

The FinTech Evolution: Technology Push, Market Pull Dynamics, and Inertia Tatja Karkkainen , 2023-01-17 This work serves as a base for foundational knowledge of the taxonomy vocabulary and concepts in the interdisciplinary field of financial

technology FinTech It is specifically written for innovation management in financial services For this end it is integral to inspect the evolution of FinTech through technology push market pull dynamics and inertia because they play a crucial role in shaping the direction and rate of innovation Technology push relates to the development and introduction of new technologies that drive innovation in the financial industry Market pull dynamics on the other hand relate to the demand for new financial products and services that arises from changing consumer needs and preferences The interaction between market pull and technology push can be described as a feedback loop which can be then affected by inertia Inertia can be described as resistance to change that is often present in consumers which can hinder the creation of new technologies and innovations In this sense the consumer inertia can affect the relationship between technology push and market demand making it difficult for new financial technology applications to gain traction if they are not seen as offering significant improvements By understanding the interplay between these three factors it is possible to gain insight into the current state and future direction of the FinTech industry and from there Financial Services Industry
