Wilde,2025-09-09

This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective. Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon. Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object. The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged. Considering its decidedly international and interdisciplinary scope AI Aesthetics AI Generated Images between Artistics and Aisthetics will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies. **Reader Bot** Naomi S. Baron, 2026-01-20 What happens to human reading when AI bots can do it for us? Explosive developments in artificial intelligence have awed everyday users with the technology's ability to draw do computer coding and especially to write. Those AI generated essays and poems legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student lawyer or researcher might produce AI doesn't read the way that humans do. Now that AI is proving an adept reader what happens to our own reading skills and motivations especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading a deeply human activity to bots. What do we stand to gain and lose when we let AI read for us? Tracing the intersecting trajectories of AI and reading Reader Bot tackles this vital question revealing why we must be thoughtful about how we welcome AI as reader into our lives.
