Moons Very Short Introduction Introductions Ebook:

Moons David A. Rothery, 2015-11-26 Proving to be both varied and fascinating moons are far more common than planets in our Solar System Our own Moon has had a profound influence on Earth not only through tidal effects but even on the behaviour of some marine animals Many remarkable things have been discovered about the moons of the giant outer planets from Voyager Galileo Cassini and other spacecraft Scientists have glimpsed volcanic activity on Io found oceans of water on Titan and captured photos of icy geysers bursting from Enceladus It looks likely that microbial life beyond the Earth may be discovered on a moon rather than a planet In this Very Short Introduction David Rothery introduces the reader to the moons of our Solar System beginning with the early discoveries of Galileo and others describing their variety of mostly mythological names and the early use of Jupiter's moons to establish position at sea and to estimate the speed of light Rothery discusses the structure formation and influence of our Moon and those of the other planets and ends with the recent discovery of moons orbiting asteroids whilst looking forward to the possibility of finding moons of exoplanets in planetary systems far beyond our own ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable Ebook: Evolving Dialogues in Multiculturalism and Multicultural Education Richard Race, 2024-03-20

Richard Race has long proven that multicultural education and multiculturalism in British education are key to understanding and fostering social and community cohesion This important book builds on decades of work adding fresh insights that reflect the complexity of social and political issues faced in the UK What Race and colleagues have done is both courageous and coruscating Professor Paul W Miller Director of the Institute for Educational Social Equity UK This edited book is a powerful curation of narratives which set out pertinent and relevant perspectives on evolving dialogues in multiculturalism and multicultural education It is a timely comprehensive and insightful tome which will be a useful addition to any global anti racist bookshelf Dr Susan Davis Reader in Diversity Equity and Inclusion in Education School of Education and Social Policy Cardiff Metropolitan University UK Multicultural dialogues are as important now as ever This volume explores narratives in education that have developed internationally in response to changing policies and the modern world Its contributions reflect on the necessity of sustained dialogue within the wider social and political sciences alongside national and international politics to enable more multicultural voices to be heard and to respond to the challenges of the modern world Cultural diversity is a great societal strength and globalisation within education can increase our understanding of this This edited volume Comprises work by researchers from across the globe Draws on real life case studies and empirical evidence Consists of 20 chapters covering a range of topics Building on case studies from England Turkey Italy and more this text transcends national policy to ask what the core values of multicultural education truly are

From policy and pedagogy to the impact on curricula it is essential reading for students and those working across the fields of education and sociology particularly with an interest in social justice inclusion and multiculturalism Richard Race is Senior Lecturer in Education at Teesside University UK and a Visiting Professor at Sapienza University Italy Richard is a member of the Executive Board of the Society of Educational Studies and Editorial Board Member of the British Journal of Educational Studies

Planets David A. Rothery, 2010-11-25 This Very Short Introduction looks deep into space and describes the worlds that make up our Solar System terrestrial planets giant planets dwarf planets and various other objects such as satellites moons asteroids and Trans Neptunian objects It considers how our knowledge has advanced over the centuries and how it has expanded at a growing rate in recent years David A Rothery gives an overview of the origin nature and evolution of our Solar System including the controversial issues of what qualifies as a planet and what conditions are required for a planetary body to be habitable by life He looks at rocky planets and the Moon giant planets and their satellites and how the surfaces have been sculpted by geology weather and impacts ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
