Mosquito Bug S Bug S:

Insect Mite and Vertebrate Pests and their Management in Horticultural Crops P.P. Reddy, 2017-05-01 Horticulture in India is fast emerging as a major commercial venture because of higher remuneration per unit area and the realization that consumption of fruits and vegetables is essential for health and nutrition. In the last one decade export potential of horticultural crops has significantly increased attracting even multinationals into floriculture processing and value added products. Productivity of horticultural crops in India is relatively low compared to other countries. Of the several factors responsible for lower productivity of horticultural crops, pests, insect mite and vertebrate pests are considered as important limiting factors. The annual losses due to pests to all the crops in India was estimated at Rs 60 000 million in 1983 which at today's prices could exceed Rs 200 000 million. The information on pests, insect mite and vertebrate pests in horticultural crops is very much scattered. There is no such book at present which comprehensively and exclusively deals with the above aspects on horticultural crops. The present book deals with geographical distribution, damage, host range, biology, predisposing factors and management of insect mite and vertebrate pests in horticultural crops in detail using regulatory, physical, cultural, chemical, biological, host plant resistance and integrated methods. The book is extensively illustrated with excellent quality photographs enhancing the quality of publication. This book is a practical guide to practicing farmers of horticultural crops. Further, it is a useful reference to policy makers, research and extension workers and students. The material can also be used for teaching undergraduate and post graduate courses.

Boethel, 1994-09-28 Handbook of Soybean Insect Pests is the first book in a new series from the Entomological Society of America that examines pest management from all angles, magnifying practical field strategies for growers and updates growers on the latest protection techniques, preventing needless crop loss as a result of outdated pest control procedures. Edited by Leon G. Higley and David J. Boethel, this book outlines fundamental approaches to soybean pest management that can aid in reducing crop damage and loss. It provides detailed descriptions of topics such as insect identification, life history, data and management options. This comprehensive guide includes discussions on soybean ecology and physiology, soybean insect pests, predators and parasitoids, soybean pest management procedures, noninsect soybean pests and insect management. Also included are 92 color photographs, 200 illustrations, a directory of resources for obtaining local information and a glossary.
