Epigenetics and Cancer Fazlul H. Sarkar, 2013-05-29 Overall this book illustrates the complexities of the regulation and deregulation of genes mediated through epigenetics in the development and progression of human malignancies All the articles have been carefully chosen to represent several cancer systems with state of our knowledge on the role of epigenetic deregulation of microRNAs miRNAs and their target mRNAs along with epigenetic deregulation of mRNAs This book also illustrates the role of several dietary agents collectively called nutraceuticals or natural agents in modulating the epigenetic reprogramming of miRNAs and mRNAs for the prevention and or treatment of human malignancies It is well known that genetic aberrations especially inherited through parents somatic genetic alterations contribute to the development of less than 10% of all cancer yet epigenetic alterations in genes especially through selective methylation and acetylation appears to be responsible for the development and progression of the vast majority of all cancers Therefore understanding the role of epigenetics in the regulation of genes especially through deregulated expression of miRNAs as presented in this book will allow scientists to devise targeted therapeutic strategies for re expression of the lost genes or down regulate the genes that are over expressed in order to eradicate cancer It is hoped that targeting epigenetics will not only target cancer cells but it will also target the tumor microenvironment more like the entire tumor environment such as the entire host for achieving better treatment outcomes for patients diagnosed with cancer which will lead to achieve the long term objective for complete eradication of cancer This book contains fifteen chapters which begins with the concept of systems and network biology for investigating the epigenetics of cancer followed by a series of articles on the role of miRNAs and their target genes in the biology of pancreatic cancer and other cancers such as breast kidney prostate and and colon Since it is becoming increasingly clear that cancer stem cells CSCs are important in the development and progression of cancer and CSCs are important in therapeutic resistance treatment failure and tumor recurrence thus the importance of CSCs and epigenetics has been highlighted by a very timely article on epigenetic variations of stem cell markers in cancer including miRNAs Moreover just targeting heterogeneous cancer cell populations may not be optimal to eradicate tumors and for which one must take a holistic approach for developing drugs that could also target the tumor microenvironment and tumor dormancy that are regulated through epigenetics Keeping abreast with this thought process the concluding chapter provides a concept towards

curative cancer therapy with maspin which could be a unique window of opportunity to target tumor dormancy Therefore it suggest that targeting the tumor dormancy and the tumor microenvironment using novel therapeutics specifically by targeting epigenetics would become the future of medicine The One-Donkey Solution Richard Bulliet,2011-04-20 A Harvard professor an evangelical preacher a self described Rabbi a German dominatrix and the proprietor of a Scottish donkey refuge walk into bar The End Times dominate their discussion Agreeing that Christianity Judaism and Islam are all true religions and recognizing that each faith prophesies a Messiah riding on a donkey they debate two scenarios The three donkey solutionone donkey per Savior with the three racing to see who can get to Jerusalem fi rst Or the one donkey solutionthe true Messiah being the one whose devotees can corral the immortal messianic donkey that has previously borne Abraham Moses Jesus and Muhammad Eight years elapse The donkey genome is decoded American evangelicals and Irans messianic President Ahmadinejad deploy secret agents to lay hands on the sacred donkey as identi fi ed by its DNA The reader follows Toots the feisty daughter of the refuge owner and her boyfriend Fritz a student of the dominatrix as they seek to escape from these nefarious groups Israeli intelligence and a sweet and devout CIA agent come to realize that the DNA search can be circumvented by getting hold of Fritz who has actually encountered and conversed with the one true messianic donkey Yafur And then there is Yafurs evil brother Ufair **Data and Goliath** Bruce Schneier,2015-03-02 Bruce Schneier s amazing book is the best overview of privacy and security ever written Clay Shirky Your cell phone provider tracks your location and knows who s with you Your online and in store purchasing patterns are recorded and reveal if you re unemployed sick or pregnant Your e mails and texts expose your intimate and casual friends Google knows what you re thinking because it saves your private searches Facebook can determine your sexual orientation without you ever mentioning it The powers that surveil us do more than simply store this information Corporations use surveillance to manipulate not only the news articles and advertisements we each see but also the prices we re offered Governments use surveillance to discriminate censor chill free speech and put people in danger worldwide And both sides share this information with each other or even worse lose it to cybercriminals in huge data breaches Much of this is voluntary we cooperate with corporate surveillance because it promises us convenience and we submit to government surveillance because it promises us protection The result is a mass surveillance society of our own making But have we given up more than we ve gained In Data and Goliath security expert Bruce Schneier offers another path one that values both security and privacy He brings his bestseller up to date with a new preface covering the latest developments and then shows us exactly what we can do to reform government surveillance programs shake up surveillance based business models and protect our individual privacy You ll never look at your phone your computer your credit cards or even your car in the same way again *The Code* Lawrence Lane,2009-06 Jarred a CIA assassin is on a covert assignment in Africa to stop development of a genocidal virus Then he gets caught up in a second mission when the virus appears in Germany He teams up with a sniper and Peter Cahill a retired New
