Popular Music, Cultural Politics and Music Education in China Wai-Chung Ho, 2016-12-08 While attention has been paid to various aspects of music education in China to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China Before the implementation of the new curriculum reforms in China at the beginning of the twenty first century there was neither Chinese nor Western popular music in textbook materials Popular culture had long been prohibited in school music education by China s strong revolutionary orientation which feared spiritual pollution by Western cultures However since the early twenty first century education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum In relation to this topic this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education Ho presents music and music education as sociopolitical constructions of nationalism

and globalization Moreover how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education as well as the reformation of music education in mainland China is discussed Based on the perspectives of school music teachers and students the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland

Opening Markets for Foreign Skills: How Can the WTO Help? Joy Kategekwa, 2014-07-08 The Mode 4 commitments of WTO Members are narrow and shallow Even though trade negotiations for enhanced Mode 4 access started well before the launch of the DDA prospects for success are thin These negotiations followed a traditional mercantilist approach with limited attention to the underlying difficulties countries face in letting people into their borders either generally or on the basis of a WTO GATS commitment This Book argues that this approach alone will not succeed It proposes a focus not on trading market access concessions only but on discussions aimed at understanding each other's regulatory approaches To date in terms of the literature available we know very little about how WTO Members are managing their Mode 4 commitments We know even less about how the WTO could learn from clearly more advanced steps in regional liberalization processes This Book addresses these issues through case studies of market access and national treatment commitments and regulatory approaches in Economic Integration Agreements of a select group of WTO Members
