was made to China a key market for sugary soda In the US soda science was a critical force in the making of today s society of step counting fitness tracking weight obsessed citizens In China this distorted science has left its mark not just on national obesity policies but on the apparatus for managing chronic disease generally By following the scientists and their ambitious schemes to make the world safe for Coke Greenhalgh offers an account that is more global and yet more human than the story that dominates public understanding today Coke s research isn t fake science Greenhalgh argues it was real science conducted by real and eminent scientists but distorted by its aim Her gripping book raises crucial questions about conflicts of interest in scientific research the funding behind familiar messages about health and the cunning ways giant corporations come to shape our diets lifestyles and health to their own needs
