[Today's Date]

[Hiring Manager's Name]

[341 Company Address]

[Company City, State XXXXX]

[(XXX) XXX-XXXX]

[hiring.manager@gmail.com]

Dear [Mr./Mrs./Ms.] [Manager's Name],

This letter is in regard to my interest in applying for the entry-level paralegal position at [Company Name]. With my skills and qualifications, I am more than capable of providing paralegal support services to protect your company's innovations and intellectual property.

While pursuing an Associate Degree in Paralegal Studies from Southern Community College, I have developed knowledge of intellectual property law. As a member of the Junior Paralegal Club, I was able to stay up to date on all current affairs in relation to corporate law. With an internship at a mid-size law firm I was able to apply this knowledge and gain hands-on experience in the field.

During my internship with The Wachester Firm, I was responsible for:

- The preparation of documents for criminal and civil trials by scheduling and conducting interviews with clients, witnesses, and other lawyers
- Creating and maintaining a paper and electronic litigation database
- In-depth research and analysis of cases on corporate governance and litigation

Together, I believe my educational background and internship experience make me a suitable candidate for the paralegal position at your firm. I have attached my resume highlighting my academic and professional skills, and I look forward to hearing from you in due course. I appreciate your time and consideration.

Sincerely,

[Your Name]

Records and Briefs New York State Appellate Division , *Handbook of Research Design and Social Measurement* Delbert C. Miller,Neil J. Salkind,2002-01-16 If a student researcher had only one handbook on their bookshelf Miller and

Salkind's Handbook would certainly have to be it. With the updated material the addition of the section on ethical issues which is so well done that I'm recommending it to the departmental representative to the university IRB and a new Part 4 on Qualitative Methods the new Handbook is an indispensable resource for researchers. Dan Cover, Department of Sociology, Furman University, I have observed that most instructors want to teach methodology their way to imbue the course with their own approach. Miller Salkind allows one to do this easily. The book is both conceptually strong e.g. very good coverage of epistemology, research design and statistics and at the same time provides a wealth of practical knowledge: scales, indices, professional organizations, computer applications etc. In addition it covers the waterfront of methodology. Michael L. Vasu, Director of Information Technology, North Carolina State University, A unique and excellent reference tool for all social science researchers and a good textbook for graduate students and senior year undergraduate classes. These students are about to enter the real life of research and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into real research projects. For a small project the book offers enough information to get the project started. For big projects the book is ideal for information on where to look for things and examples. Jianhong Liu, Department of Sociology, Rhode Island College. The book, considered a necessity by many social science researchers and their students, has been revised and updated while retaining the features that made it so useful. The emphasis in this new edition is on the tools graduate students and more advanced researchers need to conduct high quality research. Features: Benefits: Provides step by step instruction for students' research training by beginning with how to find a creative idea, a middle range theory and initial hypothesis and proceeds through design, proposal, collection and analysis of data followed by writing, reporting and publication. Section on scales and indices are organized so that readers can quickly locate and find the type of scale or index in which they may be interested. All sections are now followed by useful and well considered reference sections so that readers can read more about each topic. Includes updated coverage on new scales, internal and external validity and new analytic techniques with extensive references on each. Presents extensive coverage of how to prepare manuscripts for publication including a list of all journals covered by Sociological Abstracts along with the editorial office address and URL for each entry. Discusses the importance of policy research with presentation and discussion of specific models as an adjunct to both applied and basic research techniques. Provides extensive coverage of funding opportunities including those offered by the National Institutes of Health, the National Science Foundation and a directory of private funding sources including relevant contact information. New to this edition: New Part 4 by John Creswell and Ray Maletta provides a comprehensive introduction to qualitative methods including a review of existing computer applications for collecting and analyzing data. New and more current reviews and commentaries have replaced dated or no longer relevant excerpts. Thousands of new references on the assessment of important sociological variables as well as references to such topics as statistical analysis, computer applications and specific topics. Thoroughly updated information on the use of computers and online research.

techniques including beginning and intermediate material about the Internet and its use by the modern research scientist
Coherent and thoughtful review of the most popular statistical analysis software packages New guidelines and discussion of
ethical practices in social and behavioral science research including extensive coverage of institutional review board
procedures and activities Expansion of social indicators to include international coverage Plus there is an extensive and well
organized table of contents with four levels of headings and for the first time in the history of the book a comprehensive
index
