Science, Technology, Engineering, and Math (STEM) programming took the library world by storm in 2013 and is still going strong today. Don't let this trendy programming theme fool you; though STEM skills are more than just a fad, they are essential. With the constant evolution in both our communities and in technology, libraries will need to make sure they stay STEM literate in the face of these changes so they can help their communities thrive. This book will show new and exciting examples of how libraries are implementing STEM education. You'll also learn how to start or improve your own STEM programming with little or no budget, even if you're not a scientist or mathematician. Special features include STEAM programs, What's in the A: Are libraries doing this already? Real examples of current and successful STEM programs created by librarians.
