Fall Boots Nvidia Gpu Same Day Delivery:

Maximum PC, 2008-04 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave

Deep Learning with R, Second Edition Francois Chollet, Tomasz Kalinowski, J. J. Allaire, 2022-09-13 Deep learning from the ground up using R and the powerful Keras library In *Deep Learning with R Second Edition* you will learn Deep learning from first principles Image classification and image segmentation Time series forecasting Text classification and machine translation Text generation neural style transfer and image generation *Deep Learning with R Second Edition* shows you how to put deep learning into action It's based on the revised new edition of Francois Chollet's bestselling *Deep Learning with Python* All code and examples have been expertly translated to the R language by Tomasz Kalinowski who maintains the Keras and Tensorflow R packages at RStudio Novices and experienced ML practitioners will love the expert insights practical techniques and important theory for building neural networks About the technology Deep learning has become essential knowledge for data scientists researchers and software developers The R language APIs for Keras and TensorFlow put deep learning within reach for all R users even if they have no experience with advanced machine learning or neural networks This book shows you how to get started on core DL tasks like computer vision natural language processing and more using R About the book *Deep Learning with R Second Edition* is a hands on guide to deep learning using the R language As you move through this book you'll quickly lock in the foundational ideas of deep learning The intuitive explanations crisp illustrations and clear examples guide you through core DL skills like image processing and text manipulation and even advanced features like transformers This revised and expanded new edition is adapted from *Deep Learning with Python Second Edition* by Francois Chollet the creator of the Keras library What's inside Image classification and image segmentation Time series forecasting Text classification and machine translation Text generation neural style transfer and image generation About the reader For readers with intermediate R skills No previous experience with Keras TensorFlow or deep learning is required About the author Francois Chollet is a software engineer at Google and creator of Keras Tomasz Kalinowski is a software engineer at RStudio and maintainer of the Keras and Tensorflow R packages J J Allaire is the founder of RStudio and the author of the first edition of this book

Table of Contents

- 1 What is deep learning
- 2 The mathematical building blocks of neural networks
- 3 Introduction to Keras and TensorFlow
- 4 Getting started with neural networks Classification and regression
- 5 Fundamentals of machine learning
- 6 The universal workflow of machine learning
- 7 Working with Keras A deep dive
- 8 Introduction to deep learning for computer vision
- 9 Advanced deep learning for computer vision
- 10 Deep learning for time series
- 11 Deep learning for text
- 12 Generative deep learning
- 13 Best practices for the real world
